Subject: FW: truck to TX

Bob,

This truck was shipped from our Blakely, GA facility last week to our Texas plant, you can see below what was on this truck, we do not want to use it in production unless you feel it is okay, Jan verbally gave Sammy the okay but now GA USDA is putting a hold on everything else in the plant.

Obviously we are not shipping any peanut butter products affected by the recall but desperately at least need to turn the Raw Peanuts on our floor into money..we have other raw peanuts on our floor that we would like to do the same with..

Could you give us advice on the status of this material..this is material that would be cooked / further processed by us in our Texas facility and tested afterwards as all of our products are...

Thanks,

Stewart
