Tab 47

7/01

Recommended Use:
To use as an energy booster: Take two capsules approximately 30 minutes prior to exercise.
To use for weight-loss: Take two capsules before breakfast or morning exercise session, and two more capsules at mid-afternoon. Begin use with one-half the recommended dose (one capsule twice per day) for the first seven days to assess your tolerance. **DO NOT EXCEED 4 CAPSULES PER DAY.** Please note: This product contains caffeine and salicin (a precursor to aspirin), and should not be taken by individuals wishing to eliminate these ingredients from their diet. *For best results, use as part of a reduced fat diet and exercise program.
Warning: Not intended for use by anyone under the age of 18. Do not use if you are pregnant or nursing or if you are at risk of or are being treated for heart disease, high blood pressure, liver, thyroid or psychiatric disease, diabetes, pernicious anemia, glaucoma, nervousness, anxiety, depression, seizure disorder, cardiac arrythmia, stroke, pheochromacytoma, difficulty in urination or prostate enlargement. Consult your physician before use if you are taking an monoamine oxidase inhibitor (MAOI) or any other prescription drug containing ephedrine, pseudoephedrine, or phenylpropanolamine (ingredients found in certain allergy, asthma, cough/cold and weight control products). Exceeding recommended serving will not improve results and may cause serious adverse health effects including heart attack and stroke. Discontinue use and call a healthcare professional immediately if you experience rapid heartbeat, dizziness, severe headache, shortness of breath, heart palpitations or similar symptoms. Individuals who consume additional caffeine with this product may experience serious adverse health effects.

The maximum recommended dosage of ephedrine for a healthy adult is no more than 100 mg. in a 24 hour period for not more than 12 weeks.

Keep out of the reach of children. The sale to persons 17 years of age or younger is prohibited.
