Subject: FDA VISIT

Hello, thank you for calling me today to see how everything is going, I just got home.

I would like to ask your assistance in two matters,

1. I need some (ie a lot-25 or so) of cartridges Y100 for a xerox copier Work Center M940- I need you to send someone out to get these first thing in the AM and send them to me so I get them by 10 AM Friday- I have bought all the ones they have in town here and they think they will get another shipment on Sat. It is taking lots to make her copies and one for Aventis, Maybell has done nothing but copy for two days, the lady said she would help- but that would not look very professional and she would wonder regarding the two copies. Thank you for your assistance, I had bought all they had last time- before my next study I,m going to have them order me a couple of cases!

2. Could you research some courses that over "certification" for Maybell and I- she asked me a couple of times if my assistant was certified- that was before she had started looking at charts or had met her. Does Aventis have anything like that in house? If we could get us scheduled for this tomorrow so I could convey to her we are planning on this I think that would be good.

3. She has not really asked me very much, we have just been pulling the charts, binders, etc. I keep going in there and ask if she has any questions anything that needs clarification. So far there has not been a lot of difference in what she has done vs. what PPD has done when they visit.

If you would like to call me this evening feel free to do so as my little girl is asleep- I have been out trying to find copier things- this is one of the few disadvantages of living in a small town. My home number is 2564426266- I don't plan to go to bed anytime soon- I am still most anxious. Regarding the issue of other antibiotics that Michael found- what should be "our" appropriate response to why the PPD monitors did not comment on that more, Michael seemed to wonder that and what if she wonders that also?

Well thank you for your prompt assistance to these matters- I hope I am not too much of a pest, I would have been a lot more comfortable if you could have been here but I understand the FDA might not.

Kindest regards,
Dr. Anne Campbell
