FDA VISIT

Hello, I wanted to give you an update, the lady from the FDA, Mrs. Smith left Friday we did not have all the documents copied that she wanted so she is going to come this week and get the remainder. I told her I would be most happy to send them overnight but she said she didn't mind-Yea!

When you called Friday I was trying to get ink off my white jacket and me-I had driven to Birmingham that Am and bought three ink cartridges, that was all one store had-this must not be a popular copier-I am going to get another one once I have a moment to breathe, and I was trying to drain all the ink out of the used ones with a syringe- I don't want my education to go to waste(HA)- we still didn't have enough ink.

I'll call you when I hear from her again.

Sincerely yours,  
Dr. Anne Campbell
