

[COMMITTEE PRINT]

JUNE 18, 2007

110TH CONGRESS  
1ST SESSION

**H. R.** \_\_\_\_\_

To

\_\_\_\_\_  
IN THE HOUSE OF REPRESENTATIVES

M\_\_\_\_. \_\_\_\_\_ introduced the following bill; which was referred to the  
Committee on \_\_\_\_\_

**A BILL**

To

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SEC. 1. TABLE OF CONTENTS.**

4 The table of contents for this Act is as follows:

Sec. 1. Table of contents.

TITLE I—PROMOTING ENERGY EFFICIENCY

Subtitle A—Appliance Efficiency

- Sec. 101. Energy standards for home appliances.
- Sec. 102. Electric motor efficiency standards.
- Sec. 103. Residential boilers.
- Sec. 104. Regional variations in heating or cooling standards.
- Sec. 105. Procedure for prescribing new or amended standards.
- Sec. 106. Expediting Appliance Standards Rulemakings.

## 2

- Sec. 107. Correction of large air conditioner rule issuance constraint.
- Sec. 108. Multiple standards.
- Sec. 109. Improving schedule for standards updating and clarifying State authority.
- Sec. 110. Updating appliance test procedures.
- Sec. 111. Furnace fan standard process.
- Sec. 112. Technical corrections.

## Subtitle B—Lighting Efficiency

- Sec. 121. Efficient light bulbs.
- Sec. 122. Incandescent reflector lamps.
- Sec. 123. Use of energy efficient lighting fixtures and bulbs.

## Subtitle C—Residential Building Efficiency

- Sec. 131. Encouraging stronger building codes.
- Sec. 132. Energy code improvements applicable to manufactured housing.
- Sec. 133. Baseline building designs.
- Sec. 134. Reauthorization of weatherization assistance program.

## Subtitle D—Commercial and Federal Building Efficiency

- Sec. 141. Definitions.
- Sec. 142. High-Performance Green Buildings.
- Sec. 143. Zero-net-energy commercial buildings goal.
- Sec. 144. Public outreach.
- Sec. 145. Budget and life-cycle costing and contracting.
- Sec. 146. Incentives.
- Sec. 147. Federal procurement.
- Sec. 148. Use of energy and water efficiency measures in Federal buildings.
- Sec. 149. Demonstration project.
- Sec. 150. Energy efficiency for data center buildings.
- Sec. 151. Authorization of appropriations.

## Subtitle E—Industrial Energy

- Sec. 161. Industrial energy.

## Subtitle F—Energy Efficiency of Public Institutions

- Sec. 171. Short title.
- Sec. 172. Findings.
- Sec. 173. Definitions.
- Sec. 174. Technical Assistance Program.
- Sec. 175. Revolving Fund.
- Sec. 176. Reauthorization of State energy programs.

## Subtitle G—Energy Savings Performance Contracting

- Sec. 181. Definition of energy savings.
- Sec. 182. Financing flexibility.
- Sec. 183. Authority to enter into contracts; reports.
- Sec. 184. Permanent reauthorization.
- Sec. 185. Training Federal contracting officers to negotiate energy efficiency contracts.
- Sec. 186. Promoting long-term energy savings performance contracts and verifying savings.

1 **TITLE I—PROMOTING ENERGY**  
 2 **EFFICIENCY**

3 **Subtitle A—Appliance Efficiency**

4 **SEC. 101. ENERGY STANDARDS FOR HOME APPLIANCES.**

5 (a) APPLIANCES.—The Energy Policy and Conserva-  
 6 tion Act is amended as follows:

7 (1) DEHUMIDIFIERS.—Section 325(cc)(2) (42  
 8 U.S.C. 6295(cc)(2)) is amended to read as follows:

9 “(2) Dehumidifiers manufactured on or after October  
 10 1, 2012, shall have an Energy Factor that meets or ex-  
 11 ceeds the following values:

<b>“Product Capacity (pints/day):</b>	<b>Minimum Energy Factor (liters/ KWh)</b>
Up to 35.00 .....	1.35
35.01-45.00 .....	1.50
45.01-54.00 .....	1.60
54.01-75.00 .....	1.70
Greater than 75.00 .....	2.5”.

12 (2) RESIDENTIAL CLOTHESWASHERS AND RESI-  
 13 DENTIAL DISHWASHERS.—Section 325(g) (42  
 14 U.S.C. 6295(g)) is amended by adding at the end  
 15 the following new paragraphs:

16 “(9) Clotheswashers manufactured on or after Janu-  
 17 ary 1, 2011, shall have—

18 “(A) a Modified Energy Factor of at least 1.26;

19 and

20 “(B) a water factor of not more than 9.5.

1       “(10) No later than December 31, 2011, the Sec-  
2 retary shall publish a final rule determining whether to  
3 amend the standards in effect for clotheswashers manufac-  
4 tured on or after January 1, 2015. Such rule shall contain  
5 such amendment, if any.

6       “(11) Dishwashers manufactured on or after January  
7 1, 2010, shall—

8               “(A) for standard size dishwashers not exceed  
9 355 kwh/year and 6.5 gallon per cycle; and

10              “(B) for compact size dishwashers not exceed  
11 260 kwh/year and 4.5 gallons per cycle.

12       “(12) No later than January 1, 2015, the Secretary  
13 shall publish a final rule determining whether to amend  
14 the standards for dishwashers manufactured on or after  
15 January 1, 2018. Such rule shall contain such amend-  
16 ment, if any.”.

17              (3) ENERGY CONSERVATION STANDARD.—Sec-  
18 tion 321(6)(A) (42 U.S.C. 6291(6)(A)) is amended  
19 by striking “or, in the case of” and inserting “and,  
20 in the case of residential clotheswashers, residential  
21 dishwashers,”.

22              (4) REFRIGERATORS AND FREEZERS.—Section  
23 325(b) (42 U.S.C. 6295(b)) is amended by adding  
24 at the end the following new paragraph:

1 “(4) Not later than December 31, 2010, the Sec-  
2 retary shall publish a final rule determining whether to  
3 amend the standards in effect for refrigerators, refrig-  
4 erator-freezers, and freezers manufactured on or after  
5 January 1, 2014. Such rule shall contain such amend-  
6 ment, if any.”.

7 (b) ENERGY STAR.—Section 324A(d)(2) of the En-  
8 ergy Policy and Conservation Act (42 U.S.C. 6294a(d)(2))  
9 is amended by striking “January 1, 2010” and inserting  
10 “July 1, 2009”.

11 **SEC. 102. ELECTRIC MOTOR EFFICIENCY STANDARDS.**

12 (a) DEFINITIONS.—Section 340(13) of the Energy  
13 Policy and Conservation Act (42 U.S.C. 6311(13)) is  
14 amended—

15 (1) by redesignating subparagraphs (B)  
16 through (H) as subparagraphs (C) through (I), re-  
17 spectively; and

18 (2) by striking the text of subparagraph (A)  
19 and inserting the following: “The term ‘general pur-  
20 pose electric motor (subtype I)’ means any motor  
21 that meets the definition of ‘General Purpose’ as es-  
22 tablished in the final rule issued by the Department  
23 of Energy for ‘Energy Efficiency Program for Cer-  
24 tain Commercial and Industrial Equipment: Test  
25 Procedures, Labeling, and Certification Require-

1       ments for Electric Motors’ (10 CFR 431), as in ef-  
2       fect on the date of enactment of the [short title].

3       “(B) The term ‘general purpose electric motor  
4 (subtype II)’ means motors incorporating the design ele-  
5 ments of a general purpose electric motor (subtype I) that  
6 are configured as one of the following:

7           “(i) U-Frame Motors.

8           “(ii) Design C Motors.

9           “(iii) Close-coupled pump motors.

10          “(iv) Footless motors.

11          “(v) Vertical solid shaft normal thrust motor  
12 (as tested in a horizontal configuration).

13          “(vi) 8-pole motors (~900 rpm).

14          “(vii) All poly-phase motors with voltages up to  
15 600 volts other than 230/460 volts.”.

16       (b) STANDARDS.—Section 342(b) of the Energy Pol-  
17 icy and Conservation Act (42 U.S.C. 6313(b)) is amended  
18 by striking the text of paragraph (1) and inserting the  
19 following: “(A) Each general purpose electric motor  
20 (subtype I), except as provided in subparagraph (B), with  
21 a power rating of 1 horsepower or greater, but not greater  
22 than 200 horsepower, manufactured (alone or as a compo-  
23 nent of another piece of equipment) after the 36-month  
24 period beginning on the date of enactment of the [short

1 title], shall have a nominal full load efficiency not less  
2 than as defined in NEMA MG-1 (2006) Table 12-12.

3 “(B) Each fire pump motor manufactured (alone or  
4 as a component of another piece of equipment) after the  
5 36-month period beginning on the date of enactment of  
6 the [short title], shall have nominal full load efficiency not  
7 less than as defined in NEMA MG-1 (2006) Table 12-  
8 11.

9 “(C) Each general purpose electric motor (subtype  
10 II) with a power rating of 1 horsepower or greater, but  
11 not greater than 200 horsepower, manufactured (alone or  
12 as a component of another piece of equipment) after the  
13 36-month period beginning on the date of enactment of  
14 the [short title], shall have a nominal full load efficiency  
15 not less than as defined in NEMA MG-1 (2006) Table  
16 12-11.

17 “(D) Each NEMA Design B, general purpose electric  
18 motor with a power rating of more than 200 horsepower,  
19 but not greater than 500 horsepower, manufactured  
20 (alone or as a component of another piece of equipment)  
21 after the 36-month period beginning on the date of enact-  
22 ment of the [short title], shall have a nominal full load  
23 efficiency not less than as defined in NEMA MG-1 (2006)  
24 Table 12-11.”.

1 **SEC. 103. RESIDENTIAL BOILERS.**

2 Section 325(f) of the Energy Policy and Conservation  
3 Act (42 U.S.C. 6925(f)) is amended—

4 (1) in the subsection heading, by inserting  
5 “AND BOILERS” after “FURNACES”;

6 (2) in paragraph (1), by striking “except that”  
7 and all that follows through “(B)” and inserting  
8 “except that”;

9 (3) by redesignating paragraph (3) as para-  
10 graph (4); and

11 (4) by inserting after paragraph (2) the fol-  
12 lowing:

13 “(3) BOILERS.—

14 “(A) IN GENERAL.—Subject to subparagraph  
15 (B), boilers manufactured on or after September 1,  
16 2012, shall meet the following requirements:

Boiler Type	Minimum Annual Fuel Utilization Efficiency	Design Requirements
Gas Hot Water .....	82%	No Constant Burning Pilot, Automatic Means for Adjusting Water Temperature
Gas Steam .....	80%	No Constant Burning Pilot
Oil Hot Water .....	84%	Automatic Means for Adjusting Temperature
Oil Steam .....	82%	None

Boiler Type	Minimum Annual Fuel Utilization Efficiency	Design Requirements
Electric Hot Water .....	None	Automatic Means for Adjusting Temperature
Electric Steam .....	None	None

1           “(B) AUTOMATIC MEANS FOR ADJUSTING  
 2           WATER TEMPERATURE.—

3           “(i) IN GENERAL.—The manufacturer  
 4           shall equip each gas, oil and electric hot water  
 5           boiler, except boilers equipped with tankless do-  
 6           mestic water heating coils, with automatic  
 7           means for adjusting the temperature of the  
 8           water supplied by the boiler to ensure that an  
 9           incremental change in inferred heat load pro-  
 10          duces a corresponding incremental change in  
 11          the temperature of water supplied.

12          “(ii) SINGLE INPUT RATE.—For a boiler  
 13          that fires at one input rate this requirement  
 14          may be satisfied by providing an automatic  
 15          means that allows the burner or heating ele-  
 16          ment to fire only when such means has deter-  
 17          mined that the inferred heat load cannot be met  
 18          by the residual heat of the water in the system.

19          “(iii) NO INFERRED HEAT LOAD.—When  
 20          there is no inferred heat load with respect to a  
 21          hot water boiler, the automatic means described

1 in clause (i) and (ii) shall limit the temperature  
2 of the water in the boiler to not more than 140  
3 degrees Fahrenheit.

4 “(iv) OPERATION.—A boiler described in  
5 clause (i) or (ii) shall be operable only when the  
6 automatic means described in clauses (i), (ii)  
7 and (iii) is installed.”.

8 **SEC. 104. REGIONAL VARIATIONS IN HEATING OR COOLING**  
9 **STANDARDS.**

10 (a) CONSUMER APPLIANCES.—Section 325(o) of the  
11 Energy Policy and Conservation Act (42 U.S.C. 6925(o))  
12 is amended by adding at the end the following new para-  
13 graph:

14 “(6)(A) The Secretary may establish regional stand-  
15 ards for space heating and air conditioning products, other  
16 than window-unit air-conditioners and portable space  
17 heaters. For each space heating and air conditioning prod-  
18 uct, the Secretary may establish a national minimum  
19 standard and two more stringent regional standards for  
20 regions determined to have significantly differing climatic  
21 conditions. Any standards set for any such region shall  
22 achieve the maximum level of energy savings that are tech-  
23 nically feasible and economically justified within that re-  
24 gion. Regional boundaries shall follow State borders and  
25 only include contiguous States (except Alaska and Ha-

1 waii), except that on the request of a State, the Secretary  
2 may divide that State to include a part of that State in  
3 each of two regions.

4 “(B) If the Secretary establishes regional standards,  
5 it shall be unlawful under section 332 to offer for sale  
6 at retail, sell at retail, or install noncomplying products  
7 except within the specified regions.

8 “(C)(i) Except as provided in clause (ii), no product  
9 manufactured to a regional standard established pursuant  
10 to subparagraph (A) shall be distributed in commerce  
11 without a prominent label affixed to the product which in-  
12 cludes at the top of the label, in print of not less than  
13 14-point type, the following: ‘It is a violation of Federal  
14 law for this product to be installed in any State outside  
15 the region shaded on the map printed on this label.’.  
16 Below this notice shall appear a map of the United States  
17 with clearly defined State boundaries and names, and with  
18 all States in which the product meets or exceeds the stand-  
19 ard established pursuant to subparagraph (A) shaded in  
20 a color or a manner as to be easily visible without obscur-  
21 ing the State boundaries and names. Below the map shall  
22 be printed on each label the following: ‘It is a violation  
23 of Federal law for this label to be removed, except by the  
24 owner and legal resident of any single-family home in  
25 which this product is installed.’.

1           “(ii) A product manufactured that meets or exceeds  
2 all regional standards established under this paragraph  
3 shall bear a prominent label affixed to the product which  
4 includes at the top of the label, in print of not less than  
5 14-point type the following: ‘This product has achieved an  
6 energy efficiency rating under Federal law allowing its in-  
7 stallation in any State.’.

8           “(D) Manufacturers of space heating and air condi-  
9 tioning equipment subject to regional standards estab-  
10 lished under this paragraph shall obtain and retain  
11 records on the intended installation locations of the equip-  
12 ment sold, and shall make such records available to the  
13 Secretary on request.”.

14           (b) INDUSTRIAL EQUIPMENT.—Section 342(a) of the  
15 Energy Policy and Conservation Act (42 U.S.C. 6313(a))  
16 is amended by adding at the end the following new para-  
17 graph:

18           “(10)(A) The Secretary may establish regional stand-  
19 ards for space heating and air conditioning products sub-  
20 ject to this subsection. For each space heating and air con-  
21 ditioning product, the Secretary may establish a national  
22 minimum standard and two more stringent regional stand-  
23 ards for regions determined to have significantly differing  
24 climatic conditions. Any standards set for any such region  
25 shall achieve the maximum level of energy savings that

1 are technically feasible and economically justified within  
2 that region. Regional boundaries shall follow State borders  
3 and only include contiguous States (except Alaska and  
4 Hawaii), except that on the request of a State, the Sec-  
5 retary may divide that State to include a part of that State  
6 in each of two regions.

7 “(B) If the Secretary establishes regional standards,  
8 it shall be unlawful under section 345 to offer for sale  
9 at retail, sell at retail, or install noncomplying products  
10 except within the specified regions.

11 “(C) Manufacturers of space heating and air condi-  
12 tioning equipment subject to regional standards estab-  
13 lished under this paragraph shall obtain and retain  
14 records on the intended installation locations of the equip-  
15 ment sold, and shall make such records available to the  
16 Secretary on request.”.

17 **SEC. 105. PROCEDURE FOR PRESCRIBING NEW OR AMEND-**  
18 **ED STANDARDS.**

19 Section 325(p) of the Energy Policy and Conserva-  
20 tion Act (42 U.S.C. 6925(p)) is amended—

21 (1) by striking paragraph (1); and

22 (2) by redesignating paragraphs (2) through

23 (4) as paragraphs (1) through (3), respectively.

1 **SEC. 106. EXPEDITING APPLIANCE STANDARDS**  
2 **RULEMAKINGS.**

3 (a) **DIRECT FINAL RULE.**—Section 325(p) of the En-  
4 ergy Policy and Conservation Act (42 U.S.C. 6295(p)) is  
5 amended by adding a new paragraph (5) as follows:

6 “(5) If manufacturers of any type (or class) of  
7 covered products or covered equipment, States, and  
8 efficiency advocates, or persons determined by the  
9 Secretary to fully represent such parties, submit to  
10 the Secretary a joint recommendation of an energy  
11 or water conservation standard and the Secretary  
12 determines that the recommended standard complies  
13 with subsection (o) or section 342(a)(6)(B), as appli-  
14 cable, to that type (or class) of covered products or  
15 covered equipment to which the standard would  
16 apply, the Secretary may then issue a direct final  
17 rule including the standard recommended. If the  
18 Secretary determines that a direct final rule cannot  
19 be issued based on such a submitted joint rec-  
20 ommendation, the Secretary shall publish a deter-  
21 mination with an explanation as to why the joint  
22 recommendation does not comply with this para-  
23 graph. For purposes of this paragraph, the term ‘di-  
24 rect final rule’ means a final rule published the same  
25 day with a parallel notice of proposed rulemaking  
26 that proposes a new or amended energy or water

1 conservation standard that is identical to the stand-  
2 ard set forth in the final rule. There shall be a 110-  
3 day period for public comment with respect to the  
4 direct final rule. Not later than 10 days after the ex-  
5 piration of such 110-day period, the Secretary shall  
6 publish a notice responding to comments received  
7 with respect to the direct final rule. The Secretary  
8 shall withdraw a direct final rule promulgated pur-  
9 suant to this paragraph within 120 days after publi-  
10 cation in the Federal Register if the Secretary re-  
11 ceives, with respect to the direct final rule, one or  
12 more adverse public comments or any alternate joint  
13 recommendation and, based on the rulemaking  
14 record, the Secretary determines that such adverse  
15 comments or alternate joint recommendation may  
16 provide a reasonable basis for withdrawing the direct  
17 final rule under subsection (o), section 342(a)(6)(B),  
18 or any applicable law. In such a case, the Secretary  
19 shall then proceed with the parallel notice of pro-  
20 posed rulemaking, and shall identify in a notice pub-  
21 lished in the Federal Register the reasons for the  
22 withdrawal of the direct final rule. A direct final rule  
23 that is withdrawn in accordance with this paragraph  
24 shall not be considered final for purposes of sub-  
25 section (o)(1) of this section. No person shall be

1 found in violation of this part for noncompliance  
2 with a direct final rule that is withdrawn under this  
3 paragraph, if that person has complied with the ap-  
4 plicable standard in effect under this part imme-  
5 diately prior to issuance of that direct final rule.”.

6 (b) CONFORMING AMENDMENT.— Section 345(b)(1)  
7 of the Energy Policy and Conservation Act (42 U.S.C.  
8 6316(b)(1)) is amended by inserting after “section” the  
9 first time it appears “325(p)(5), section”.

10 **SEC. 107. CORRECTION OF LARGE AIR CONDITIONER RULE**  
11 **ISSUANCE CONSTRAINT.**

12 (a) DEFINITIONS.—Section 340 of the Energy Policy  
13 and Conservation Act (42 U.S.C. 6311) is amended by  
14 adding the following new paragraphs at the end:

15 “(22) The term ‘single package vertical air con-  
16 ditioner’ means air-cooled commercial package air  
17 conditioning and heating equipment; factory assem-  
18 bled as a single package having its major compo-  
19 nents arranged vertically, which is an encased com-  
20 bination of cooling and optional heating components,  
21 is intended for exterior mounting on, adjacent inte-  
22 rior to, or through an outside wall; and is powered  
23 by a single- or three-phase current. It may contain  
24 separate indoor grille(s), outdoor louvers, various  
25 ventilation options, indoor free air discharge, duct-

1 work, well plenum, or sleeve. Heating components  
2 may include electrical resistance, steam, hot water,  
3 or gas, but may not include reverse cycle refrigera-  
4 tion as a heating means.

5 “(23) The term ‘single package vertical heat  
6 pump’ means a single package vertical air condi-  
7 tioner that utilizes reverse cycle refrigeration as its  
8 primary heat source, that may include secondary  
9 supplemental heating by means of electrical resist-  
10 ance, steam, hot water, or gas.”.

11 (b) STANDARDS.—Section 342(a) of the Energy Pol-  
12 icy and Conservation Act (42 U.S.C. 6313(a)) is amend-  
13 ed—

14 (1) in each of paragraphs (1) and (2), by in-  
15 serting after “heating equipment” in the first sen-  
16 tence “, including single package vertical air condi-  
17 tioners and single package vertical heat pumps,”;

18 (2) in paragraph (1), by striking “but before  
19 January 1, 2010,”;

20 (3) in paragraph (6)(A)(i), by striking “Janu-  
21 ary 1, 2010,” and inserting “October 24, 1992”;

22 (4) in paragraph (6)(A)(ii)—

23 (A) by striking “5” and inserting “2”; and

24 (B) by striking “the effective date of a  
25 standard” and inserting “January 10, 2010, or

1 beginning on the effective date of the most re-  
2 cent revision made under clause (i) of this sub-  
3 paragraph,” ; and

4 (C) by adding the following new clause at  
5 the end:

6 “(iii) The Secretary may only initiate a rulemaking  
7 under clause (ii) of this subparagraph for a particular  
8 product so long as any standard established under a pre-  
9 vious rulemaking with respect to that product has become  
10 effective.”;

11 (5) in each of paragraphs (7), (8), and (9), by  
12 inserting after “heating equipment” in the first sen-  
13 tence “, excluding single package vertical air condi-  
14 tioners and single package vertical heat pumps,”;

15 (6) in paragraph (7)—

16 (A) by striking “manufactured on or after  
17 January 1, 2010”;

18 (B) in each of subparagraphs (A), (B), and  
19 (C) , by adding at the beginning “For equip-  
20 ment manufactured on or after January 1,  
21 2010,”; and

22 (C) by adding at the end the following new  
23 subparagraphs:

24 “(D) For equipment manufactured on or after  
25 the later of January 1, 2008, or the date six months

1 after enactment of this section, the minimum sea-  
2 sonal energy efficiency ratio of air-cooled three-phase  
3 electric central air conditioners and central air con-  
4 ditioning heat pumps less than 65,000 Btu per hour  
5 (cooling capacity), split systems, shall be 13.0.

6 “(E) For equipment manufactured on or after  
7 the later of January 1, 2008, or the date six months  
8 after enactment of this section, minimum seasonal  
9 energy efficiency ratio of air-cooled three-phase elec-  
10 tric central air conditioners and central air condi-  
11 tioning heat pumps less than 65,000 Btu per hour  
12 (cooling capacity), single package, shall be 13.0.

13 “(F) For equipment manufactured on or after  
14 the later of January 1, 2008, or the date six months  
15 after enactment of this section, minimum heating  
16 seasonal performance factor of air-cooled three-  
17 phase electric central air conditioning heat pumps  
18 less than 65,000 Btu per hour (cooling capacity),  
19 split systems, shall be 7.7.

20 “(G) For equipment manufactured on or after  
21 the later of January 1, 2008, or the date six months  
22 after enactment of this section, the minimum heat-  
23 ing seasonal performance factor of air-cooled three-  
24 phase electric central air conditioning heat pumps

1 less than 65,000 Btu per hour (cooling capacity),  
2 single package, shall be 7.7.”; and

3 (7) by adding the following new paragraphs at  
4 the end:

5 “(10) Single package vertical air conditioners and  
6 single package vertical heat pumps manufactured on or  
7 after January 1, 2010, shall meet the following standards:

8 “(A) The minimum energy efficiency ratio of  
9 single package vertical air conditioners less than  
10 65,000 Btu per hour (cooling capacity), single-  
11 phase, shall be 9.0.

12 “(B) The minimum energy efficiency ratio of  
13 single package vertical air conditioners less than  
14 65,000 Btu per hour (cooling capacity), three-phase,  
15 shall be 9.0.

16 “(C) The minimum energy efficiency ratio of  
17 single package vertical air conditioners at or above  
18 65,000 Btu per hour (cooling capacity) but less than  
19 135,000 Btu per hour (cooling capacity), shall be  
20 8.9.

21 “(D) The minimum energy efficiency ratio of  
22 single package vertical air conditioners at or above  
23 135,000 Btu per hour (cooling capacity) but less  
24 than 240,000 Btu per hour (cooling capacity), shall  
25 be 8.6.

1           “(E) The minimum energy efficiency ratio of  
2           single package vertical heat pumps less than 65,000  
3           Btu per hour (cooling capacity), single-phase, shall  
4           be 9.0; and the minimum coefficient of performance  
5           in the heating mode shall be 3.0.

6           “(F) The minimum energy efficiency ratio of  
7           single package vertical heat pumps less than 65,000  
8           Btu per hour (cooling capacity), three-phase, shall  
9           be 9.0; and the minimum coefficient of performance  
10          in the heating mode shall be 3.0.

11          “(G) The minimum energy efficiency ratio of  
12          single package vertical heat pumps at or above  
13          65,000 Btu per hour (cooling capacity) but less than  
14          135,000 Btu per hour (cooling capacity), shall be  
15          8.9; and the minimum coefficient of performance in  
16          the heating mode shall be 3.0.

17          “(H) The minimum energy efficiency ratio of  
18          single package vertical heat pumps at or above  
19          135,000 Btu per hour (cooling capacity) but less  
20          than 240,000 Btu per hour (cooling capacity), shall  
21          be 8.6; and the minimum coefficient of performance  
22          in the heating mode shall be 2.9.

23          “(11) Not later than 36 months after the date of en-  
24          actment of this paragraph, the Secretary shall review the  
25          most recently published ASHRAE/IES Standard 90.1

1 with respect to single package vertical air conditioners and  
2 single package vertical heat pumps according to the proce-  
3 dures established in paragraph (6).”.

4 **SEC. 108. MULTIPLE STANDARDS.**

5 (a) CONSUMER APPLIANCES.—Section 325(o)(5) of  
6 the Energy Policy and Conservation Act (42 U.S.C.  
7 6925(o)(5)) is amended by inserting “If a covered product  
8 includes 2 or more independent energy-using features, the  
9 Secretary may set more than 1 energy conservation stand-  
10 ard for that covered product with respect to those fea-  
11 tures.” after “each major function.”.

12 (b) INDUSTRIAL EQUIPMENT.—Section 342 of the  
13 Energy Policy and Conservation Act (42 U.S.C. 6313) is  
14 amended by adding at the end the following new sub-  
15 section:

16 “(f) MULTIPLE STANDARDS.—If covered equipment  
17 includes 2 or more independent energy-using features, the  
18 Secretary may set more than 1 energy conservation stand-  
19 ard for that covered equipment with respect to those fea-  
20 tures.”.

21 **SEC. 109. IMPROVING SCHEDULE FOR STANDARDS UPDAT-**  
22 **ING AND CLARIFYING STATE AUTHORITY.**

23 (a) CONSUMER APPLIANCES.—Section 325(m) of the  
24 Energy Policy and Conservation Act (42 U.S.C. 6295(m))  
25 is amended to read as follows:

1           “(m) FURTHER RULEMAKING.—(1) Not later than 6  
2 years after issuance of any final rule establishing or  
3 amending a standard, as required for a product under this  
4 part, the Secretary shall publish either—

5           “(A) a notice of the Secretary’s determination  
6 that standards for that product do not need to be  
7 amended, based on the criteria in subsection (n)(2);  
8 or

9           “(B) a notice of proposed rulemaking including  
10 new proposed standards.

11 In either case, the Secretary shall also publish a no-  
12 tice stating that the Department’s analysis is pub-  
13 licly available, and provide opportunity for written  
14 comment.

15           “(2) Not later than 2 years after a notice is issued  
16 under paragraph (1)(B), the Secretary shall publish a  
17 final rule amending the standard for the product. Not  
18 later than 3 years after a determination under paragraph  
19 (1)(A), the Secretary shall make a new determination and  
20 publication under paragraph (1)(A) or (B).

21           “(3) An amendment prescribed under this subsection  
22 shall apply to products manufactured after a date which  
23 is 3 years after publication of the final rule establishing  
24 a standard, except that a manufacturer shall not be re-  
25 quired to apply new standards to a product with respect

1 to which other new standards have been required within  
2 the prior 6 years.

3 “(4) If the Secretary does not publish a final deter-  
4 mination for a product by the date required in paragraph  
5 (1) or a final standard for a product by the date required  
6 in paragraph (2), then, notwithstanding section 327, a  
7 State shall not be preempted from establishing standards  
8 for that product until—

9 “(A) the date on which an amended Federal  
10 standard takes effect; or

11 “(B) 3 years after notice of a determination not  
12 to amend the standard.”.

13 (b) INDUSTRIAL EQUIPMENT.—Section 342(a)(6) of  
14 the Energy Policy and Conservation Act (42 U.S.C.  
15 6313(a)(6)) is amended—

16 (1) by redesignating subparagraph (C) as sub-  
17 paragraph (D); and

18 (2) by amending the remainder of the para-  
19 graph to read as follows:

20 “(6)(A) If ASHRAE/IES Standard 90.1 is  
21 amended with respect to any small, large, or very  
22 large commercial package air conditioning and heat-  
23 ing equipment, packaged terminal air conditioners,  
24 packaged terminal heat pumps, warm-air furnaces,  
25 packaged boilers, storage water heaters, instant-

1 neous water heaters, or unfired hot water storage  
2 tanks, the Secretary shall within 6 months publish  
3 in the Federal Register for public comment an anal-  
4 ysis of the energy savings potential of the amended  
5 energy efficiency standards. The Secretary shall es-  
6 tablish an amended uniform national standard for  
7 that product at the minimum level for each effective  
8 date specified in the amended ASHRAE/IES Stand-  
9 ard 90.1 within 18 months of the ASHRAE amend-  
10 ment's publication, unless the Secretary determines,  
11 by rule published in the Federal Register, and sup-  
12 ported by clear and convincing evidence, that adop-  
13 tion of a uniform national standard more stringent  
14 than such amended ASHRAE/IES Standard 90.1  
15 for such product would result in significant addi-  
16 tional conservation of energy and is technologically  
17 feasible and economically justified.

18 “(B) If the Secretary issues a rule containing  
19 such a determination, the rule shall establish such  
20 amended standard, and shall be issued within 30  
21 months of the ASHRAE amendment's publication.

22 “(C)(i) Not later than 6 years after issuance of  
23 any final rule establishing or amending a standard,  
24 as required for a product under this part, the Sec-  
25 retary shall publish either—

1           “(I) a notice of the Secretary’s determina-  
2           tion that standards for that product do not  
3           need to be amended, based on the criteria in  
4           subparagraph (A); or

5           “(II) a notice of proposed rulemaking in-  
6           cluding new proposed standards.

7           In either case, the Secretary shall also publish  
8           a notice stating that the Department’s analysis  
9           is publicly available, and provide opportunity  
10          for written comment.

11          “(ii) Not later than 2 years after a notice is  
12          issued under clause (i)(II), the Secretary shall pub-  
13          lish a final rule amending the standard for the prod-  
14          uct. Not later than 3 years after a determination  
15          under clause (i)(I), the Secretary shall make a new  
16          determination and publication under clause (i)(I) or  
17          (II).

18          “(iii) An amendment prescribed under this sub-  
19          paragraph shall apply to products manufactured  
20          after a date which is 3 years after publication of the  
21          final rule establishing a standard, except that a  
22          manufacturer shall not be required to apply new  
23          standards to a product with respect to which other  
24          new standards have been required within the prior  
25          6 years.

1           “(iv) If the Secretary does not publish a final  
2           determination for a product by the date required in  
3           clause (i) or a final standard for a product by the  
4           date required in clause (ii), then, notwithstanding  
5           section 327 and section 345(b)(2)(A), a State shall  
6           not be preempted from establishing standards for  
7           that product until—

8                   “(I) the date on which an amended Fed-  
9                   eral standard takes effect; or

10                   “(II) 3 years after publication of a final  
11                   rule under which a determination is made not  
12                   to amend the standard.”.

13 **SEC. 110. UPDATING APPLIANCE TEST PROCEDURES.**

14           (a) CONSUMER APPLIANCES.—Section 323(b)(1)(A)  
15           of the Energy Policy and Conservation Act (42 U.S.C.  
16           6923(b)(1)(A)) is amended by striking “The Secretary  
17           may” and all that follows through “paragraph (3)” and  
18           inserting “At least every 7 years the Secretary shall review  
19           test procedures for all covered products and shall—

20                   “(i) amend test procedures with respect to any  
21                   covered product if the Secretary determines that  
22                   amended test procedures would more accurately or  
23                   fully comply with the requirements of paragraph (3);  
24                   or

1           “(ii) publish notice in the Federal Register of  
2           any determination not to amend a test procedure”.

3           (b) INDUSTRIAL EQUIPMENT.—Section 343(a)(1) of  
4 the Energy Policy and Conservation Act (42 U.S.C.  
5 6314(a)(1)) is amended by striking “The Secretary may”  
6 and all that follows through “this section” and inserting  
7 “At least every 7 years the Secretary shall conduct an  
8 evaluation of each class of covered equipment and—

9           “(B) if the Secretary determines that amended  
10          test procedures would more accurately or fully com-  
11          ply with the requirements of paragraphs (2) and (3),  
12          shall prescribe test procedures for such class in ac-  
13          cordance with the provisions of this section; or

14          “(C) shall publish notice in the Federal Reg-  
15          ister of any determination not to amend a test pro-  
16          cedure”.

17 **SEC. 111. FURNACE FAN STANDARD PROCESS.**

18          Section 325(f)(3)(D) of the Energy Policy and Con-  
19 servation Act (42 U.S.C. 6295(f)(3)(D)) is amended—

20          (1) by striking “may” and inserting “shall”; and

21          (2) by inserting “not later than July 1, 2013” after  
22 “duct work”.

23 **SEC. 112. TECHNICAL CORRECTIONS.**

24          (a) Section 135(a)(1)(A)(ii) of the Energy Policy Act  
25 of 2005 (Public Law 109–58) is amended by striking

1 “C78.1–1978(R1984)” and inserting “C78.3–  
2 1978(R1984)”.

3 (b) Section 325 of the Energy Policy and Conserva-  
4 tion Act (42 U.S.C. 6295) (as amended by section  
5 135(e)(4) of the Energy Policy Act of 2005) is amended—

6 (1) in subsection (v)—

7 (A) in the subsection heading, by striking  
8 “CEILING FANS AND”;

9 (B) by striking paragraph (1); and

10 (C) by redesignating paragraphs (2)  
11 through (4) as paragraphs (1) through (3), re-  
12 spectively; and

13 (2) in subsection (ff)—

14 (A) in paragraph (1)(A)—

15 (i) by striking clause (iii);

16 (ii) by redesignating clause (iv) as  
17 clause (iii); and

18 (iii) in clause (iii)(II) (as so redesign-  
19 nated), by inserting “fans sold for” before  
20 “outdoor”; and

21 (B) in paragraph (4)(C)—

22 (i) in the matter preceding clause (i),  
23 by striking “subparagraph (B)” and in-  
24 serting “subparagraph (A)”;

1 (ii) by striking clause (ii) and insert-  
2 ing the following:

3 “(ii) shall be packaged with lamps to fill all  
4 sockets.”;

5 (C) in paragraph (6), by redesignating  
6 subparagraphs (C) and (D) as clauses (i) and  
7 (ii), respectively, of subparagraph (B); and

8 (D) in paragraph (7), by striking “327”  
9 the second place it appears and inserting  
10 “324”.

## 11 **Subtitle B—Lighting Efficiency**

### 12 **SEC. 121. EFFICIENT LIGHT BULBS.**

13 (a) REGULATIONS.—Not later than 1 year after the  
14 date of enactment of this Act, the Secretary of Energy  
15 shall issue regulations—

16 (1) prohibiting the sale of light bulbs that emit  
17 less than 25 lumens per watt, effective January 1,  
18 2010; and

19 (2) prohibiting the sale of light bulbs that emit  
20 less than 60 lumens per watt, effective January 1,  
21 2015.

22 (b) EXEMPTIONS.—The regulations issued under  
23 subsection (a) shall include procedures for the Secretary  
24 to provide exemptions to the prohibition. The Secretary  
25 may provide such an exemption only in cases where the

1 Secretary finds, after a hearing and opportunity for public  
2 comment, that it is not technically feasible to serve a spe-  
3 cialized lighting application, such as a military, medical,  
4 public safety, or certified historic lighting application,  
5 using bulbs that meet the requirements of subsection (a).  
6 Exemptions provided under this subsection shall expire  
7 after 2 years. No exemption may be provided under this  
8 subsection for general illumination applications.

9 (c) CIVIL PENALTY.—The Secretary of Energy shall  
10 include in regulations under this section a schedule of ap-  
11 propriate civil penalties for violations of the prohibition  
12 under this section. Such penalties shall be in an amount  
13 sufficient to ensure compliance with this section.

14 (d) PLAN.—Not later than 6 months after the date  
15 of enactment of this Act, the Secretary of Energy shall  
16 transmit to the Congress a plan for encouraging and pro-  
17 viding incentives for the domestic production of more effi-  
18 cient light bulbs by United States manufacturers.

19 (e) DEFINITION.—For purposes of this section, the  
20 term “general illumination” means lighting designed to  
21 provide a substantially uniform level of luminance  
22 throughout an area exclusive of any provision for special  
23 or local requirements.

1 **SEC. 122. INCANDESCENT REFLECTOR LAMPS.**

2 (a) DEFINITIONS.—Section 321 of the Energy Policy  
3 and Conservation Act (42 U.S.C. 6291) is amended—

4 (1) in paragraph (30)(C)(ii)—

5 (A) in the matter preceding subclause

6 (I)—

7 (i) by striking “or similar bulb shapes

8 (excluding ER or BR)” and inserting “ER,

9 BR, BPAR, or similar bulb shapes”; and

10 (ii) by striking “2.75” and inserting

11 “2.25”; and

12 (B) by striking “is either—” and all that

13 follows through subclause (II) and inserting

14 “has a rated wattage that is greater than 40

15 watts.”; and

16 (2) by adding at the end the following:

17 “(52) The term ‘BPAR incandescent reflector  
18 lamp’ means a reflector lamp as shown in figure  
19 C78.21–278 on page 32 of ANSI C78.21–2003.

20 “(53)(A) The term ‘BR incandescent reflector  
21 lamp’ means a reflector lamp that has—

22 “(i) a bulged section below the major di-  
23 ameter of the bulb and above the approximate  
24 baseline of the bulb, as shown in figure 1 (RB)  
25 on page 7 of ANSI C79.1—1994, incorporated  
26 by reference in section 430.22 of title 10, Code

1 of Federal Regulations (as in effect on the date  
2 of enactment of this paragraph); and

3 “(ii) a finished size and shape shown in  
4 ANSI C78.21—1989, including the referenced  
5 reflective characteristics in part 7 of ANSI  
6 C78.21.

7 “(B) The term ‘BR30’ refers to a BR incandes-  
8 cent reflector lamp with a diameter of 30/8ths of an  
9 inch and the term ‘BR40’ refers to a BR incandes-  
10 cent reflector lamp with a diameter of 40/8ths of an  
11 inch.

12 “(54)(A) The term ‘ER incandescent reflector  
13 lamp’ means a reflector lamp that has—

14 “(i) an elliptical section below the major  
15 diameter of the bulb and above the approximate  
16 baseline of the bulb, as shown in figure 1 (RE)  
17 on page 7 of ANSI C79.1—1994, incorporated  
18 by reference in section 430.22 of title 10, Code  
19 of Federal Regulations (as in effect on the date  
20 of enactment of this paragraph); and

21 “(ii) a finished size and shape shown in  
22 ANSI C78.21—1989, incorporated by reference  
23 in section 430.22 of title 10, Code of Federal  
24 Regulations (as in effect on the date of enact-  
25 ment of this paragraph).

1           “(B) The term ‘ER30’ refers to an ER incan-  
2           descent reflector lamp with a diameter of 30/8ths of  
3           an inch and the term ‘ER40’ refers to an ER incan-  
4           descent reflector lamp with a diameter of 40/8ths of  
5           an inch.

6           “(55) The term ‘R20 incandescent reflector  
7           lamp’ means a reflector lamp that has a face diame-  
8           ter of approximately 2.5 inches, as shown in figure  
9           1(R) on page 7 of ANSI C79.1–1994.”.

10          (b) STANDARDS FOR FLUORESCENT LAMPS AND IN-  
11          CANDESCENT REFLECTOR LAMPS.—Section 325(i) of the  
12          Energy Policy and Conservation Act (42 U.S.C. 6925(i))  
13          is amended by striking paragraph (1) and inserting the  
14          following:

15                 “(1) STANDARDS.—

16                         “(A) DEFINITION OF EFFECTIVE DATE.—

17                         In this paragraph, except as specified in sub-  
18                         paragraphs (C) and (D), the term ‘effective  
19                         date’ means, with respect to each type of lamp  
20                         specified in a table contained in subparagraph  
21                         (B), the last day of the period of months cor-  
22                         responding to that type of lamp, as specified in  
23                         the table, that follows the date of enactment of  
24                         the [short title].

1                   “(B) MINIMUM STANDARDS.—Each of the  
 2 following general service fluorescent lamps and  
 3 incandescent reflector lamps manufactured  
 4 after the effective date specified in the tables  
 5 contained in this paragraph shall meet or ex-  
 6 ceed the following lamp efficacy and CRI stand-  
 7 ards:

“FLUORESCENT LAMPS

Lamp Type	Nominal Lamp Wattage	Minimum CRI	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
4-foot medium bi-pin .....	>35 W	69	75.0	36
	≤35 W	45	75.0	36
2-foot U-shaped .....	>35 W	69	68.0	36
	≤35 W	45	64.0	36
8-foot slimline .....	65 W	69	80.0	18
	≤65 W	45	80.0	18
8-foot high output .....	>100 W	69	80.0	18
	≤100 W	45	80.0	18

“INCANDESCENT REFLECTOR LAMPS

Nominal Lamp Wattage	Minimum Average Lamp Efficacy (LPW)	Effective Date (Period of Months)
40–50 .....	10.5	36
51–66 .....	11.0	36
67–85 .....	12.5	36
86–115 .....	14.0	36
116–155 .....	14.5	36
156–205 .....	15.0	36

8                   “(C) EXEMPTIONS.—The standards speci-  
 9 fied in subparagraph (B) shall not apply to the  
 10 following types of incandescent reflector lamps:

11                   “(i) Lamps rated at 50 watts or less  
 12 of the following types: ER30, BR30,  
 13 BR40, and ER40 lamps.

1 “(ii) Lamps rated at 65 watts of the  
2 following types: BR30, BR40, and ER40  
3 lamps.

4 “(iii) R20 incandescent reflector  
5 lamps of 45 watts or less.

6 “(D) EFFECTIVE DATES.—

7 “(i) ER, BR, AND BPAR LAMPS.—Ex-  
8 cept as provided in subparagraph (A), the  
9 standards specified in subparagraph (B)  
10 shall apply with respect to ER incandes-  
11 cent reflector lamps, BR incandescent re-  
12 flector lamps, BPAR incandescent reflector  
13 lamps, and similar bulb shapes on and  
14 after January 1, 2008.

15 “(ii) LAMPS BETWEEN 2.25–2.75  
16 INCHES IN DIAMETER.—The standards  
17 specified in subparagraph (B) shall apply  
18 with respect to incandescent reflector  
19 lamps with a diameter of more than 2.25  
20 inches, but not more than 2.75 inches, on  
21 and after January 1, 2008.”.

22 **SEC. 123. USE OF ENERGY EFFICIENT LIGHTING FIXTURES**  
23 **AND BULBS.**

24 (a) IN GENERAL.—Chapter 33 of title 40, United  
25 States Code, is amended—

1           (1) by redesignating sections 3313, 3314, and  
2           3315 as sections 3314, 3315, and 3316, respectively;  
3           and

4           (2) by inserting after section 3312 the fol-  
5           lowing:

6   **“§ 3313. Use of energy efficient lighting fixtures and**  
7           **bulbs**

8           “(a) CONSTRUCTION AND ALTERATION OF PUBLIC  
9   BUILDINGS.—Each public building constructed or signifi-  
10   cantly altered by the Administrator of General Services  
11   shall be equipped, to the maximum extent feasible as de-  
12   termined by the Administrator, with lighting fixtures and  
13   bulbs that are energy efficient.

14          “(b) MAINTENANCE OF PUBLIC BUILDINGS.—Each  
15   lighting fixture or bulb that is replaced by the Adminis-  
16   trator in the normal course of maintenance of public build-  
17   ings shall be replaced, to the maximum extent feasible as  
18   determined by the Administrator, with a lighting fixture  
19   or bulb that is energy efficient.

20          “(c) CONSIDERATIONS.—In making a determination  
21   under this section concerning the feasibility of installing  
22   a lighting fixture or bulb that is energy efficient, the Ad-  
23   ministrator shall consider—

24               “(1) the life cycle cost effectiveness of the fix-  
25               ture or bulb;

1           “(2) the compatibility of the fixture or bulb  
2 with existing equipment;

3           “(3) whether use of the fixture or bulb could re-  
4 sult in interference with productivity;

5           “(4) the aesthetics relating to use of the fixture  
6 or bulb; and

7           “(5) such other factors as the Administrator  
8 determines appropriate.

9           “(d) ENERGY STAR.—A lighting fixture or bulb shall  
10 be treated as being energy efficient for purposes of this  
11 section if—

12           “(1) the fixture or bulb is certified under the  
13 Energy Star program established by section 324A of  
14 the Energy Policy and Conservation Act (42 U.S.C.  
15 6294a); or

16           “(2) the Administrator has otherwise deter-  
17 mined that the fixture or bulb is energy efficient.

18           “(e) SIGNIFICANT ALTERATIONS.—A public building  
19 shall be treated as being significantly altered for purposes  
20 of subsection (a) if the alteration is subject to congres-  
21 sional approval under section 3307.

22           “(f) EFFECTIVE DATE.—The requirements of sub-  
23 sections (a) and (b) shall take effect one year after the  
24 date of enactment of this subsection.”.

1 (b) CONFORMING AMENDMENT.—The analysis for  
2 chapter 33 of title 40, United States Code, is amended  
3 by striking the items relating to sections 3313, 3314, and  
4 3315 and inserting the following:

“3313. Use of energy efficient lighting fixtures and bulbs.

“3314. Delegation.

“3315. Report to Congress.

“3316. Certain authority not affected.”.

## 5 **Subtitle C—Residential Building** 6 **Efficiency**

### 7 **SEC. 131. ENCOURAGING STRONGER BUILDING CODES.**

8 (a) IN GENERAL.—Section 304 of the Energy Con-  
9 servation and Production Act (42 U.S.C. 6833) is amend-  
10 ed to read as follows:

#### 11 **“SEC. 304. UPDATING STATE BUILDING ENERGY EFFI- 12 CIENCY CODES.**

13 “(a) UPDATING NATIONAL MODEL BUILDING EN-  
14 ERGY CODES.—(1) The Secretary shall support updating  
15 the national model building energy codes and standards  
16 at least every three years to achieve overall energy savings,  
17 compared to the 2006 IECC for residential buildings and  
18 ASHRAE Standard 90.1 2004 for commercial buildings,  
19 of at least—

20 “(A) 30 percent by 2010;

21 “(B) 50 percent by 2020; and

22 “(C) targets to be set by the Secretary in inter-  
23 mediate and subsequent years, at the maximum level

1 of energy efficiency that is technologically feasible  
2 and life-cycle cost effective.

3 “(2)(A) Whenever the provisions of the IECC or  
4 ASHRAE Standard 90.1 regarding building energy use  
5 are revised, the Secretary shall, not later than 6 months  
6 after the date of such revision, determine—

7 “(i) whether such revision will improve energy  
8 efficiency in buildings; and

9 “(ii) whether such revision will meet the targets  
10 under paragraph (1).

11 “(B) If the Secretary makes a determination under  
12 subparagraph (A)(ii) that a code or standard does not  
13 meet the targets under paragraph (1), or if a national  
14 model code or standard is not updated for more than three  
15 years, then the Secretary shall within 12 months propose  
16 a modified code or standard that meets such targets. The  
17 modified code or standard shall serve as the baseline for  
18 the next determination under subparagraph (A)(i).

19 “(C) The Secretary shall provide the opportunity for  
20 public comment on targets, determinations, and modified  
21 codes and standards under this subsection, and shall pub-  
22 lish notice of targets, determinations, and modified codes  
23 and standards under this subsection in the Federal Reg-  
24 ister.

1           “(b) STATE CERTIFICATION OF BUILDING ENERGY  
2 CODE UPDATES.—(1) Not later than 2 years after the  
3 date of enactment of the [short title], each State shall cer-  
4 tify to the Secretary that it has reviewed and updated the  
5 provisions of its residential and commercial building codes  
6 regarding energy efficiency. Such certification shall in-  
7 clude a demonstration that such State’s code provisions  
8 meet or exceed the 2006 IECC for residential buildings  
9 and the ASHRAE Standard 90.1-2004 for commercial  
10 buildings, or achieve equivalent or greater energy savings.

11           “(2)(A) If the Secretary makes an affirmative deter-  
12 mination under subsection (a)(2)(A)(i) or proposes a  
13 modified code or standard under subsection (a)(2)(B),  
14 each State shall within 2 years certify that it has reviewed  
15 and updated the provisions of its building code regarding  
16 energy efficiency. Such certification shall include a dem-  
17 onstration that such State’s code provisions meet or ex-  
18 ceed the revised code or standard, or achieve equivalent  
19 or greater energy savings.

20           “(B) If the Secretary fails to make a determination  
21 under subsection (a)(2)(A)(i) by the date specified in sub-  
22 section (a)(2), or makes a negative determination, each  
23 State shall within 2 years after the specified date or the  
24 date of the determination, certify that it has reviewed the  
25 revised code or standard, and updated the provisions of

1 its building code regarding energy efficiency to meet or  
2 exceed any provisions found to improve energy efficiency  
3 in buildings, or to achieve equivalent or greater energy  
4 savings in other ways.

5       “(c) STATE CERTIFICATION OF COMPLIANCE WITH  
6 BUILDING CODES.—(1) Each State shall, not later than  
7 3 years after a certification under subsection (b), certify  
8 that it has achieved compliance with the certified building  
9 energy code. Such certification shall include documenta-  
10 tion of the rate of compliance based on independent in-  
11 spections of a random sample of the new and renovated  
12 buildings covered by the code in the preceding year.

13       “(2) A State shall be considered to achieve compli-  
14 ance under paragraph (1) if—

15               “(A) at least 90 percent of new and renovated  
16 buildings covered by the code in the preceding year  
17 substantially meet all the requirements of the code;  
18 or

19               “(B) the estimated excess energy use of new  
20 and renovated buildings that did not meet the code  
21 in the preceding year, compared to a baseline of  
22 comparable buildings that meet the code, is not more  
23 than 10 percent of the estimated energy use of all  
24 new and renovated buildings covered by the code in  
25 the preceding year.

1           “(d) FAILURE TO MEET DEADLINES.—(1) The Sec-  
2 retary shall permit extensions of the deadlines for the cer-  
3 tification requirements under subsections (b) and (c) of  
4 this section for up to 1 year if a State can demonstrate  
5 that it has made a good faith effort to comply with such  
6 requirements and that it has made significant progress in  
7 doing so.

8           “(2) Any State for which the Secretary has not ac-  
9 cepted a certification by a deadline under subsection (b)  
10 or (c) of this section, with any extension granted under  
11 paragraph (1), is out of compliance with this section.

12           “(3) In any State that is out of compliance with this  
13 section, a local government may be in compliance with this  
14 section by meeting the certification requirements under  
15 subsections (b) and (c) of this section.

16           “(e) TECHNICAL ASSISTANCE.—(1) The Secretary  
17 shall provide technical assistance, including building en-  
18 ergy analysis and design tools, building demonstrations,  
19 and design assistance and training to enable the national  
20 model building energy codes and standards to meet the  
21 targets in subsection (a)(1).

22           “(2) The Secretary shall provide technical assistance  
23 to States to implement the requirements of this section,  
24 including procedures for States to demonstrate that their  
25 code provisions achieve equivalent or greater energy sav-

1 ings than the national model codes and standards, and to  
2 improve and implement State residential and commercial  
3 building energy efficiency codes or to otherwise promote  
4 the design and construction of energy efficient buildings.

5       “(f) AVAILABILITY OF INCENTIVE FUNDING.—(1)  
6 The Secretary shall provide incentive funding to States to  
7 implement the requirements of this section, and to im-  
8 prove and implement State residential and commercial  
9 building energy efficiency codes, including increasing and  
10 verifying compliance with such codes. In determining  
11 whether, and in what amount, to provide incentive funding  
12 under this subsection, the Secretary shall consider the ac-  
13 tions proposed by the State to implement the requirements  
14 of this section, to improve and implement residential and  
15 commercial building energy efficiency codes, and to pro-  
16 mote building energy efficiency through the use of such  
17 codes.

18       “(2) Additional funding shall be provided under this  
19 subsection for implementation of a plan to achieve and  
20 document at least a 90 percent rate of compliance with  
21 residential and commercial building energy efficiency  
22 codes, based on energy performance—

23               “(A) to a State that has adopted and is imple-  
24               menting, on a Statewide basis—

1           “(i) a residential building energy efficiency  
2           code that meets or exceeds the requirements of  
3           the 2006 IECC, or any succeeding version of  
4           that code that has received an affirmative de-  
5           termination from the Secretary under sub-  
6           section (a)(2)(A)(i); and

7           “(ii) a commercial building energy effi-  
8           ciency code that meets or exceeds the require-  
9           ments of the ASHRAE Standard 90.1-2004, or  
10          any succeeding version of that standard that  
11          has received an affirmative determination from  
12          the Secretary under subsection (a)(2)(A)(i); or

13          “(B) in a State in which there is no Statewide  
14          energy code either for residential buildings or for  
15          commercial buildings, to a local government that has  
16          adopted and is implementing residential and com-  
17          mercial building energy efficiency codes, as described  
18          in subparagraph (A).

19          “(3) Of the amounts made available under this sub-  
20          section, the Secretary may use \$500,000 or more for each  
21          fiscal year to train State and local officials to implement  
22          codes described in paragraph (2).

23          “(4)(A) There are authorized to be appropriated to  
24          carry out this subsection—

1           “(i) \$25,000,000 for each of fiscal years 2008  
2 through 2012; and

3           “(ii) such sums as are necessary for fiscal year  
4 2013 and each fiscal year thereafter.

5           “(B) Funding provided to States under paragraph  
6 (2) for each fiscal year shall not exceed one-half of the  
7 excess of funding under this subsection over \$5,000,000  
8 for the fiscal year.”.

9           (b) DEFINITION.—Section 303 of the Energy Con-  
10 servation and Production Act (42 U.S.C. 6832) is amend-  
11 ed by adding at the end the following new paragraph:

12           “(17) The term ‘IECC’ means the International  
13 Energy Conservation Code.”.

14 **SEC. 132. ENERGY CODE IMPROVEMENTS APPLICABLE TO**  
15 **MANUFACTURED HOUSING.**

16           (a) IN GENERAL.—Not later than 4 years after the  
17 date of enactment of this Act, the Secretary of Energy  
18 shall by regulation establish standards for energy effi-  
19 ciency in manufactured housing.

20           (b) CERTAIN REQUIREMENTS.—The regulations  
21 under subsection (a) shall be in accordance with the fol-  
22 lowing:

23           (1) The energy conservation standards estab-  
24 lished under this subsection shall be based on the  
25 most recent version of the International Energy

1 Conservation Code (including supplements) except  
2 where the Secretary finds that such code is not cost-  
3 effective, or a more stringent standard would be  
4 more cost-effective, based on total life-cycle con-  
5 struction and operating costs.

6 (2) The energy conservation standards estab-  
7 lished under this subsection may—

8 (A) take into consideration the design and  
9 factory construction techniques of manufac-  
10 tured homes;

11 (B) be based on the climate zones estab-  
12 lished by the Department of Housing and  
13 Urban Development rather than those under  
14 the International Energy Conservation Code;  
15 and

16 (C) provide for alternative practices that  
17 result in net estimated energy consumption  
18 equal to or less than the specified standards.

19 (3) The energy conservation standards estab-  
20 lished under this subsection shall be updated within  
21 one year after the date of enactment of this Act and  
22 within one year after any revision to the Inter-  
23 national Energy Conservation Code.

24 (c) ENFORCEMENT.—Any manufacturer of manufac-  
25 tured housing that violates a provision of the regulations

1 under subsection (a) is liable to the United States for a  
2 civil penalty in an amount not exceeding 1 percent of the  
3 manufacturer's retail list price of the manufactured hous-  
4 ing.

5 **SEC. 133. BASELINE BUILDING DESIGNS.**

6 Section 327(f)(3)(D) of the Energy Policy and Con-  
7 servation Act (42 U.S.C. 6297(f)(3)(D)) is amended to  
8 read as follows:

9 “(D) If the code uses one or more baseline  
10 building designs against which all submitted building  
11 designs are to be evaluated and such baseline build-  
12 ing designs contain a covered product subject to an  
13 energy conservation standard established in or pre-  
14 scribed under section 325, the baseline building de-  
15 signs are based on the efficiency level for such cov-  
16 ered product which—

17 “(i) meets but does not exceed such stand-  
18 ard;

19 “(ii) is the efficiency level required by a  
20 regulation of that State for which the Secretary  
21 has issued a rule granting a waiver under sub-  
22 section (d) of this section; or

23 “(iii) is a level that, when evaluated in the  
24 baseline building design, the State has found to  
25 be feasible and cost-effective.”.

1 **SEC. 134. REAUTHORIZATION OF WEATHERIZATION ASSIST-**  
2 **ANCE PROGRAM.**

3 Section 422 of the Energy Conservation and Produc-  
4 tion Act (42 U.S.C. 6872) is amended by striking  
5 “\$500,000,000 for fiscal year 2006, \$600,000,000 for fis-  
6 cal year 2007, and \$700,000,000 for fiscal year 2008”  
7 and inserting “\$600,000,000 for fiscal year 2007, and  
8 \$750,000,000 for each of fiscal years 2008, 2009, 2010,  
9 2011, and 2012”.

10 **Subtitle D—Commercial and**  
11 **Federal Building Efficiency**

12 **SEC. 141. DEFINITIONS.**

13 In this subtitle:

14 (1) COMMITTEE.—The term “Committee”  
15 means the Green Building Advisory Committee es-  
16 tablished under section 142(c)(1).

17 (2) DIRECTOR.—The term “Director” means  
18 the individual appointed to the position established  
19 under section 142(b).

20 (3) FEDERAL FACILITY.—

21 (A) IN GENERAL.—The term “Federal fa-  
22 cility” means any building or facility the in-  
23 tended use of which requires the building or fa-  
24 cility to be—

25 (i) accessible to the public; and

1 (ii) constructed or altered by or on be-  
2 half of the United States.

3 (B) EXCLUSIONS.—The term “Federal fa-  
4 cility” does not include a privately-owned resi-  
5 dential or commercial structure that is not  
6 leased by the Federal Government.

7 (4) HIGH-PERFORMANCE GREEN BUILDING.—  
8 The term “high-performance green building” means  
9 a building that, during its life-cycle—

10 (A) reduces energy, water, and material re-  
11 source use;

12 (B) improves indoor environmental quality  
13 including, reducing indoor pollution, improving  
14 thermal comfort, and improving lighting and  
15 acoustic environments that affect occupant  
16 health and productivity;

17 (C) reduces negative impacts on the envi-  
18 ronment throughout the life-cycle of the build-  
19 ing, including air and water pollution and waste  
20 generation;

21 (D) increases the use of environmentally  
22 preferable products, including biobased, recycled  
23 content, and nontoxic products with lower life-  
24 cycle impacts;

1           (E) increases reuse and recycling opportu-  
2 nities;

3           (F) integrates systems in the building;

4           (G) reduces the environmental and energy  
5 impacts of transportation through building loca-  
6 tion and site design that support a full range  
7 of transportation choices for users of the build-  
8 ing; and

9           (H) considers indoor and outdoor effects of  
10 the building on human health and the environ-  
11 ment, including—

12                 (i) improvements in worker produc-  
13 tivity;

14                 (ii) the life-cycle impacts of building  
15 materials and operations; and

16                 (iii) other factors that the Office con-  
17 siders to be appropriate.

18           (5) LIFE-CYCLE.—The term “life-cycle”, with  
19 respect to a high-performance green building, means  
20 all stages of the useful life of the building (including  
21 components, equipment, systems, and controls of the  
22 building) beginning at conception of a green building  
23 project and continuing through site selection, design,  
24 construction, landscaping, commissioning, operation,

1 maintenance, renovation, deconstruction or demoli-  
2 tion, removal, and recycling of the green building.

3 (6) LIFE-CYCLE ASSESSMENT.—The term “life-  
4 cycle assessment” means a comprehensive system  
5 approach for measuring the environmental perform-  
6 ance of a product or service over the life of the prod-  
7 uct or service, beginning at raw materials acquisition  
8 and continuing through manufacturing, transpor-  
9 tation, installation, use, reuse, and end-of-life waste  
10 management.

11 (7) LIFE-CYCLE COSTING.—The term “life-cycle  
12 costing”, with respect to a high-performance green  
13 building, means a technique of economic evaluation  
14 that—

15 (A) sums, over a given study period, the  
16 costs of initial investment (less resale value), re-  
17 placements, operations (including energy use),  
18 and maintenance and repair of an investment  
19 decision; and

20 (B) is expressed—

21 (i) in present value terms, in the case  
22 of a study period equivalent to the longest  
23 useful life of the building, determined by  
24 taking into consideration the typical life of

1                   such a building in the area in which the  
2                   building is to be located; or

3                   (ii) in annual value terms, in the case  
4                   of any other study period.

5           (8) OFFICE.—The term “Office” means the Of-  
6           fice of High-Performance Green Buildings estab-  
7           lished under section 142(a).

8           (9) PRACTICES.—The term “practices” mean  
9           design, financing, permitting, construction, commis-  
10          sioning, operation and maintenance, and other prac-  
11          tices that contribute to achieving zero-net-energy  
12          commercial buildings.

13          (10) SECRETARY.—The term “Secretary”  
14          means the Secretary of Energy.

15          (11) ZERO-NET-ENERGY.—The term “zero-net-  
16          energy commercial building” means a building that  
17          is designed, constructed, and operated to—

18                   (A) produce on site and distribute as much  
19                   energy on an annual basis as it uses from exter-  
20                   nal sources;

21                   (B) result in no net emissions of green-  
22                   house gases; and

23                   (C) be economically viable to construct and  
24                   operate, through a combination of ultra energy-  
25                   efficient building materials and equipment, ef-

1           fective control systems, and onsite power gen-  
2           eration from renewable or other energy sources;  
3           and

4 **SEC. 142. HIGH-PERFORMANCE GREEN BUILDINGS.**

5           (a) ESTABLISHMENT OF OFFICE.—Not later than 60  
6 days after the date of enactment of this Act, the Secretary  
7 shall establish within the Office of Energy Efficiency and  
8 Renewable Energy an Office of High-Performance Green  
9 Buildings.

10          (b) DIRECTOR.—

11           (1) APPOINTMENT.—The Secretary shall ap-  
12           point an individual to serve as Director, a position  
13           in the career-reserved Senior Executive service, to  
14           carry out duties as required under this subtitle.

15           (2) COMPENSATION.—The compensation of the  
16           Director shall not exceed the maximum rate of basic  
17           pay for the Senior Executive Service under section  
18           5382 of title 5, United States Code, including any  
19           applicable locality-based comparability payment that  
20           may be authorized under section 5304(h)(2)(C) of  
21           that title.

22           (3) DUTIES.—The Director shall—

23           (A) identify and biennially reassess im-  
24           proved or higher rating standards recommended  
25           by the Committee;

1 (B) identify and develop green building  
2 standards that could be used for all types of  
3 Federal facilities;

4 (C) establish green practices that can be  
5 used throughout the life of a Federal facility;

6 (D) review and analyze current Federal  
7 budget practices and life-cycle costing issues,  
8 and make recommendations to Congress, in ac-  
9 cordance with section 145;

10 (E) identify within the planning, budg-  
11 eting, and construction process all types of Fed-  
12 eral facility procedures that inhibit new and ex-  
13 isting Federal facilities from becoming high-per-  
14 formance green buildings as measured by—

15 (i) a silver rating, as defined by the  
16 Leadership in Energy and Environmental  
17 Design Building Rating System standard  
18 established by the United States Green  
19 Building Council (or an equivalent rating);  
20 or

21 (ii) an improved or higher rating  
22 standard, as identified by the Committee;

23 (F) identify inconsistencies, as reported to  
24 the Committee, in Federal law with respect to

1 product acquisition guidelines and high-per-  
2 formance product guidelines;

3 (G) recommend language for uniform  
4 standards for use by Federal agencies in envi-  
5 ronmentally responsible acquisition;

6 (H) in coordination with the Office of  
7 Management and Budget, review the budget  
8 process for capital programs with respect to al-  
9 ternatives for—

10 (i) restructuring of budgets to require  
11 the use of complete energy- and environ-  
12 mental-cost accounting;

13 (ii) using operations expenditures in  
14 budget-related decisions while simulta-  
15 neously incorporating productivity and  
16 health measures (as those measures can be  
17 quantified by the Office, with the assist-  
18 ance of universities and national labora-  
19 tories);

20 (iii) permitting Federal agencies to re-  
21 tain all identified savings accrued as a re-  
22 sult of the use of life-cycle costing for fu-  
23 ture high-performance green building ini-  
24 tiatives; and

1 (iv) identifying short-term and long-  
2 term cost savings that accrue from high-  
3 performance green buildings, including  
4 those relating to health and productivity;

5 (I) identify green, self-sustaining tech-  
6 nologies to address the operational needs of  
7 Federal facilities in times of national security  
8 emergencies, natural disasters, or other dire  
9 emergencies;

10 (J) in consultation with the Committee, de-  
11 velop and implement a comprehensive indoor air  
12 quality program for all Federal facilities to en-  
13 sure the safety of Federal workers and facility  
14 occupants—

15 (i) during new construction and ren-  
16 ovation of facilities; and

17 (ii) in existing facilities; and

18 (K) perform such other functions as are  
19 assigned under this subtitle.

20 (4) COORDINATION.—The Director shall ensure  
21 full coordination of high-performance green building  
22 information and activities, including activities under  
23 this subtitle, within the Federal Government by  
24 working with the General Services Administration  
25 and all relevant agencies, including, at a minimum—

1 (A) the Environmental Protection Agency;

2 (B) the Office of the Federal Environ-  
3 mental Executive;

4 (C) the Office of Federal Procurement Pol-  
5 icy;

6 (D) the Department of Energy, particu-  
7 larly the Federal Energy Management Pro-  
8 gram;

9 (E) the Department of Health and Human  
10 Services;

11 (F) the Department of Defense;

12 (G) such other Federal agencies as the Di-  
13 rector considers to be appropriate; and

14 (H) such nonprofit green building rating  
15 and analysis entities as the Director determines  
16 can offer support, expertise, and review serv-  
17 ices.

18 (c) GREEN BUILDING ADVISORY COMMITTEE.—

19 (1) ESTABLISHMENT AND MEMBERSHIP.—Not  
20 later than 180 days after the date of enactment of  
21 this Act, the Director shall establish a senior-level  
22 Federal green building advisory committee, which  
23 shall provide advice and recommendations in accord-  
24 ance with this subtitle, and shall include representa-  
25 tion from—

- 1 (A) the design professions;
- 2 (B) the development, construction, and  
3 real estate industries;
- 4 (C) financial institutions;
- 5 (D) building owners and operators from  
6 the public and private sectors;
- 7 (E) academic and research organizations;
- 8 (F) State and local building code agencies;
- 9 (G) independent green building associa-  
10 tions or councils;
- 11 (H) experts in indoor air quality and envi-  
12 ronmental factors;
- 13 (I) State and utility energy efficiency pro-  
14 grams; and
- 15 (J) nongovernmental energy efficiency or-  
16 ganizations.

17 (2) MEETINGS.—The Director shall establish a  
18 regular schedule of meetings for the Committee,  
19 which shall convene a minimum of 6 times each  
20 year.

21 (3) DUTIES.—The Committee shall provide ad-  
22 vice and expertise for use by the Director in carrying  
23 out the duties under this subtitle, including such  
24 recommendations relating to Federal activities car-

1 ried out under sections 145 and 146 as are agreed  
2 to by a majority of the members of the Committee.

3 (4) COMPENSATION OF MEMBERS.—Each mem-  
4 ber of the Committee who is not an officer or em-  
5 ployee of the Federal Government shall be com-  
6 pensated at a rate equal to the daily equivalent of  
7 the annual rate of basic pay prescribed for level III  
8 of the Executive Schedule under section 5315 of title  
9 5, United States Code, for each day (including travel  
10 time) during which such member is engaged in the  
11 performance of the duties of the Committee. All  
12 members of the Committee who are officers or em-  
13 ployees of the United States shall serve without com-  
14 pensation in addition to that received for their serv-  
15 ices as officers or employees of the United States.

16 (5) TRAVEL EXPENSES.—The members of the  
17 Committee shall be allowed travel expenses, includ-  
18 ing per diem in lieu of subsistence, at rates author-  
19 ized for employees of agencies under subchapter I of  
20 chapter 57 of title 5, United States Code, while  
21 away from their homes or regular places of business  
22 in the performance of services for the Committee.

23 (6) FACA EXEMPTION.—The Committee shall  
24 not be subject to the Federal Advisory Committee  
25 Act (5 U.S.C. App.).

1 (d) REPORT.—Not later than 2 years after the date  
2 of enactment of this Act, and biennially thereafter, the Di-  
3 rector shall submit to Congress a report that—

4 (1) describes the status of the green building  
5 initiatives under this subtitle and other Federal pro-  
6 grams in effect as of the date of the report, includ-  
7 ing—

8 (A) the extent to which the programs are  
9 being carried out in accordance with this sub-  
10 title; and

11 (B) the status of funding requests and ap-  
12 propriations for those programs;

13 (2) summarizes and highlights development, at  
14 the State and local level, of green building initia-  
15 tives, including executive orders, policies, or laws  
16 adopted promoting green building (including the sta-  
17 tus of implementation of those initiatives); and

18 (3) includes, for the 2-year period covered by  
19 the report, recommendations to address each of the  
20 matters, and a plan for implementation of each rec-  
21 ommendation, described in paragraph (1) of this  
22 subsection and subparagraphs (E) through (I) of  
23 subsection (b)(3).

1 **SEC. 143. ZERO-NET-ENERGY COMMERCIAL BUILDINGS**

2 **GOAL.**

3 (a) GOAL.—The Director, in collaboration with the  
4 Committee, shall study, refine, and adopt a national goal  
5 to reduce commercial building energy use and achieve  
6 zero-net-energy commercial buildings. Unless the Director  
7 concludes that such targets are unachievable or unreal-  
8 istic, the goal shall include objectives that—

9 (1) all new commercial buildings constructed  
10 after the beginning of 2025 are zero-net-energy com-  
11 mercial buildings;

12 (2) by 2035, 50 percent of the then existing  
13 stock of commercial buildings that were constructed  
14 before 2025 are zero-net-energy commercial build-  
15 ings; and

16 (3) by 2050, all commercial buildings are zero-  
17 net-energy commercial buildings.

18 (b) FEDERAL COMPLIANCE WITH GOAL.—The Di-  
19 rector shall further identify and adopt a strategy of devel-  
20 opment and widespread deployment of technologies, prac-  
21 tices, and policies leading to zero-net-energy performance  
22 for all Federal buildings in accordance with the adopted  
23 goal.

24 **SEC. 144. PUBLIC OUTREACH.**

25 The Director, in coordination with the Committee,  
26 shall carry out public outreach to inform individuals and

1 entities of the information and services available Govern-  
2 ment-wide by—

3 (1) establishing and maintaining a national  
4 high-performance green building clearinghouse, in-  
5 cluding on the Internet, that—

6 (A) identifies existing similar efforts and  
7 coordinates activities of common interest; and

8 (B) provides information relating to high-  
9 performance green buildings, including  
10 hyperlinks to Internet sites that describe the ac-  
11 tivities, information, and resources of—

12 (i) the Federal Government;

13 (ii) State and local governments;

14 (iii) the private sector (including non-  
15 governmental and nonprofit entities and  
16 organizations); and

17 (iv) international organizations;

18 (2) identifying and recommending educational  
19 resources for implementing high-performance green  
20 building practices, including security and emergency  
21 benefits and practices;

22 (3) providing access to technical assistance on  
23 using tools and resources to make more cost-effec-  
24 tive, energy-efficient, health-protective, and environ-  
25 mentally beneficial decisions for constructing high-

1 performance green buildings, particularly tools avail-  
2 able to conduct life-cycle costing and life-cycle as-  
3 sessment;

4 (4) providing information on application proc-  
5 esses for certifying a high-performance green build-  
6 ing, including certification and commissioning;

7 (5) providing technical information, market re-  
8 search, or other forms of assistance or advice that  
9 would be useful in planning and constructing high-  
10 performance green buildings;

11 (6) using such other methods as are determined  
12 by the Director to be appropriate;

13 (7) surveying existing research and studies re-  
14 lating to high-performance green buildings;

15 (8) coordinating activities of common interest;

16 (9) developing and recommending a high-per-  
17 formance green building practices that—

18 (A) identify information and research  
19 needs, including the relationships between  
20 health, occupant productivity, and each of—

21 (i) pollutant emissions from materials  
22 and products in the building;

23 (ii) natural day lighting;

24 (iii) ventilation choices and tech-  
25 nologies;

- 1 (iv) heating, cooling, and system con-  
2 trol choices and technologies;
- 3 (v) moisture control and mold;
- 4 (vi) maintenance, cleaning, and pest  
5 control activities;
- 6 (vii) acoustics; and
- 7 (viii) other issues relating to the  
8 health, comfort, productivity, and perform-  
9 ance of occupants of the building; and
- 10 (B) promote the development and dissemi-  
11 nation of high-performance green building  
12 measurement tools that, at a minimum, may be  
13 used—
- 14 (i) to monitor and assess the life-cycle  
15 performance of facilities (including dem-  
16 onstration projects) built as high-perform-  
17 ance green buildings; and
- 18 (ii) to perform life-cycle assessments;
- 19 (10) assisting the budget and life-cycle costing  
20 functions of the Office under section 145;
- 21 (11) studying and identifying potential benefits  
22 of green buildings relating to security, natural dis-  
23 aster, and emergency needs of the Federal Govern-  
24 ment; and

1           (12) supporting other research initiatives deter-  
2           mined by the Office.

3 **SEC. 145. BUDGET AND LIFE-CYCLE COSTING AND CON-**  
4 **TRACTING.**

5           The Director, in coordination with the Committee,  
6 shall—

7           (1) identify, review, and analyze current budget  
8           and contracting practices that affect achievement of  
9           high-performance green buildings, including the  
10          identification of barriers to green building life-cycle  
11          costing and budgetary issues;

12          (2) develop guidance and conduct training ses-  
13          sions with budget specialists and contracting per-  
14          sonnel from Federal agencies and budget examiners  
15          to apply life-cycle cost criteria to actual projects;

16          (3) identify tools to aid life-cycle cost decision-  
17          making; and

18          (4) explore the feasibility of incorporating the  
19          benefits of green buildings, such as security benefits,  
20          into a cost-budget analysis to aid in life-cycle costing  
21          for budget and decision making processes.

22 **SEC. 146. INCENTIVES.**

23          As soon as practicable after the date of enactment  
24          of this Act, the Director shall identify incentives to encour-  
25          age the use of green buildings and related technology in

1 the operations of the Federal Government, including  
2 through—

3 (1) the provision of recognition awards; and

4 (2) the maximum feasible retention of financial  
5 savings in the annual budgets of Federal agencies  
6 for use in reinvesting in future green building initia-  
7 tives.

8 **SEC. 147. FEDERAL PROCUREMENT.**

9 (a) IN GENERAL.—Not later than 2 years after the  
10 date of enactment of this Act, the Director of the Office  
11 of Federal Procurement Policy, in consultation with the  
12 Director and the Under Secretary of Defense for Acquisi-  
13 tion, Technology, and Logistics, shall promulgate revisions  
14 of the applicable acquisition regulations, to take effect as  
15 of the date of promulgation of the revisions—

16 (1) to direct any Federal procurement execu-  
17 tives involved in the acquisition, construction, or  
18 major renovation (including contracting for the con-  
19 struction or major renovation) of any facility—

20 (A) to employ integrated design principles;

21 (B) to improve site selection for environ-  
22 mental and community benefits;

23 (C) to optimize building and systems en-  
24 ergy performance;

25 (D) to protect and conserve water;

1 (E) to enhance indoor environmental qual-  
2 ity; and

3 (F) to reduce environmental impacts of  
4 materials and waste flows; and

5 (2) to direct Federal procurement executives in-  
6 volved in leasing buildings, to give preference to the  
7 lease of facilities that—

8 (A) are energy-efficient; and

9 (B) to the maximum extent practicable,  
10 have applied contemporary high-performance  
11 and sustainable design principles during con-  
12 struction or renovation.

13 (b) GUIDANCE.—Not later than 90 days after the  
14 date of promulgation of the revised regulations under sub-  
15 section (a), the Director of the Office of Procurement Pol-  
16 icy shall issue guidance to all Federal procurement execu-  
17 tives providing direction and instructions to renegotiate  
18 the design of proposed facilities, renovations for existing  
19 facilities, and leased facilities to incorporate improvements  
20 that are consistent with this section.

21 **SEC. 148. USE OF ENERGY AND WATER EFFICIENCY MEAS-**  
22 **URES IN FEDERAL BUILDINGS.**

23 (a) ENERGY AND WATER EVALUATIONS.—Not later  
24 than 1 year after the date of enactment of this Act, and  
25 every 3 years thereafter, each Federal agency shall com-

1 plete a comprehensive energy and water evaluation pro-  
2 vided by the Director for—

3 (1) each building and other facility of the Fed-  
4 eral agency that is larger than a minimum size es-  
5 tablished by the Director; and

6 (2) any other building or other facility of the  
7 Federal agency that meets any other criteria estab-  
8 lished by the Director.

9 (b) IMPLEMENTATION OF IDENTIFIED ENERGY AND  
10 WATER EFFICIENCY MEASURES.—

11 (1) IN GENERAL.—Not later than 2 years after  
12 the date of enactment of this Act, and every 3 years  
13 thereafter, each Federal agency—

14 (A) shall fully implement each energy and  
15 water-saving measure that the Federal agency  
16 identified in the evaluation conducted under  
17 subsection (a) that has a 15-year simple pay-  
18 back period; and

19 (B) may implement any energy or water-  
20 saving measure that the Federal agency identi-  
21 fied in the evaluation conducted under sub-  
22 section (a) that has longer than a 15-year sim-  
23 ple payback period.

24 (2) PAYBACK PERIOD.—

1 (A) IN GENERAL.—For the purpose of  
2 paragraph (1), a measure shall be considered to  
3 have a 15-year simple payback if the quotient  
4 obtained under subparagraph (B) is less than  
5 or equal to 15.

6 (B) QUOTIENT.—The quotient for a meas-  
7 ure shall be obtained by dividing—

8 (i) the estimated initial implementa-  
9 tion cost of the measure (other than fi-  
10 nancing costs); by

11 (ii) the annual cost savings from the  
12 measure.

13 (3) COST SAVINGS.—For the purpose of para-  
14 graph (2), cost savings shall include net savings in  
15 estimated—

16 (A) energy and water costs;

17 (B) operations, maintenance, repair, re-  
18 placement, and other direct costs; and

19 (C) external environmental, health, secu-  
20 rity, and other costs based on a cost adder, as  
21 determined in accordance with the guidelines  
22 issued by the Director under subsection (d).

23 (4) EXCEPTIONS.—The Director may modify or  
24 make exceptions to the calculation of a 15-year sim-

1       ple payback under this paragraph in the guidelines  
2       issued by the Director under subsection (d).

3       (c) FOLLOW-UP ON IMPLEMENTED MEASURES.—For  
4       each measure implemented under subsection (b), each  
5       Federal agency shall carry out—

6             (1) commissioning;

7             (2) operations, maintenance, and repair; and

8             (3) measurement and verification of energy and  
9       water savings.

10       (d) GUIDELINES.—

11            (1) IN GENERAL.—The Director shall issue  
12       guidelines and necessary criteria that each Federal  
13       agency shall follow for implementation of—

14               (A) subsection (a) not later than 90 days  
15       after the date of enactment of this Act; and

16               (B) subsections (b) and (c) not later than  
17       180 days after the date of enactment of this  
18       Act.

19            (2) RELATIONSHIP TO FUNDING SOURCE.—The  
20       guidelines issued by the Director under paragraph  
21       (1) shall be appropriate and uniform for measures  
22       funded with each type of funding made available  
23       under subsection (h).

24       (e) WEB-BASED CERTIFICATION.—

1           (1) IN GENERAL.—For each building and other  
2 facility that meets the criteria established by the Di-  
3 rector under subsection (a), each Federal agency  
4 shall use a web-based tracking system to certify  
5 compliance with the requirements for—

6           (A) energy and water evaluations under  
7 subsection (a);

8           (B) implementation of identified energy  
9 and water measures under subsection (b); and

10          (C) follow-up on implemented measures  
11 under subsection (c).

12          (2) DEPLOYMENT.—Not later than 1 year after  
13 the date of enactment of this Act, the Director shall  
14 deploy the web-based tracking system required under  
15 this subsection in a manner that tracks, at a min-  
16 imum—

17          (A) the covered buildings and other facili-  
18 ties;

19          (B) the status of evaluations;

20          (C) the identified measures, with estimated  
21 costs and savings;

22          (D) the status of implementing the meas-  
23 ures;

24          (E) the measured savings; and

25          (F) the persistence of savings.

1 (3) AVAILABILITY.—

2 (A) IN GENERAL.—Subject to subpara-  
3 graph (B), the Director shall make the web-  
4 based tracking system required under this para-  
5 graph available to Congress, other Federal  
6 agencies, and the public through the Internet.

7 (B) EXEMPTIONS.—At the request of a  
8 Federal agency, the Director may exempt spe-  
9 cific data for specific buildings from disclosure  
10 under subparagraph (A) for national security  
11 purposes.

12 (f) BENCHMARKING OF FEDERAL FACILITIES.—

13 (1) IN GENERAL.—Each Federal agency shall  
14 enter energy use data for each building and other fa-  
15 cility of the Federal agency into a building energy  
16 use benchmarking system, such as the Energy Star  
17 Portfolio Manager.

18 (2) SYSTEM AND GUIDANCE.—Not later than 1  
19 year after the date of enactment of this Act, the Di-  
20 rector shall—

21 (A) select or develop the building energy  
22 use benchmarking system required under this  
23 subsection for each type of building; and

24 (B) issue guidance for use of the system.

25 (g) FEDERAL AGENCY SCORECARDS.—

1           (1) IN GENERAL.—The Director shall issue  
2 quarterly scorecards for energy management activi-  
3 ties carried out by each Federal agency that in-  
4 cludes—

5           (A) summaries of the status of—

6                 (i) energy and water evaluations  
7 under subsection (a);

8                 (ii) implementation of identified en-  
9 ergy and water measures under subsection  
10 (b); and

11                (iii) follow-up on implemented meas-  
12 ures under subsection (c); and

13           (B) any other means of measuring per-  
14 formance that the Director considers appro-  
15 priate.

16           (2) AVAILABILITY.—The Director shall make  
17 the scorecards required under this paragraph avail-  
18 able to Congress, other Federal agencies, and the  
19 public through the Internet.

20           (h) FUNDING OPTIONS.—

21           (1) IN GENERAL.—To carry out subsections (a)  
22 through (c), a Federal agency may use any combina-  
23 tion of—

24                 (A) appropriated funds made available  
25 under this subtitle; and

1 (B) private financing, including financing  
2 available through energy savings performance  
3 contracts or utility energy savings contracts.

4 (2) COMBINED FUNDING FOR SAME MEAS-  
5 URE.—A Federal agency may use any combination  
6 of appropriated funds and private financing de-  
7 scribed in paragraph (1) to carry out the same  
8 measure under this section, with proportional alloca-  
9 tion for any energy and water savings.

10 (3) LACK OF APPROPRIATED FUNDS.—Since  
11 measures may be carried out using private financing  
12 described in paragraph (1), a lack of available ap-  
13 propriations shall not be considered a sufficient rea-  
14 son for the failure of a Federal agency to comply  
15 with subsections (a) through (c).

16 **SEC. 149. DEMONSTRATION PROJECT.**

17 (a) IN GENERAL.—The Director shall establish  
18 guidelines to implement a demonstration project to con-  
19 tribute to the research goals of the Office.

20 (b) PROJECTS.—In accordance with guidelines estab-  
21 lished by the Director under subsection (a) and the duties  
22 of the Director described in this subtitle, the Director shall  
23 carry out—

24 (1) for each of fiscal years 2009 through 2014,  
25 1 demonstration project in a Federal building se-

1 lected by the Director in accordance with relevant  
2 agencies and described in subsection (c)(1), that—

3 (A) provides for the evaluation of the in-  
4 formation obtained through the conduct of  
5 projects and activities under this subtitle; and

6 (B) achieves a platinum rating, as defined  
7 by the Leadership in Energy and Environ-  
8 mental Design Building Rating System stand-  
9 ard established by the United States Green  
10 Building Council (or equivalent rating);

11 (2) no fewer than 4 demonstration projects at  
12 4 universities, that, as competitively selected by the  
13 Director in accordance with subsection (c)(2),  
14 have—

15 (A) appropriate research resources and rel-  
16 evant projects to meet the goals of the dem-  
17 onstration project established by the Office; and

18 (B) the ability—

19 (i) to serve as a model for high-per-  
20 formance green building initiatives, includ-  
21 ing research and education;

22 (ii) to identify the most effective ways  
23 to use high-performance green building  
24 and landscape technologies to engage and

1 educate undergraduate and graduate stu-  
2 dents;

3 (iii) to effectively implement a high-  
4 performance green building education pro-  
5 gram for students and occupants;

6 (iv) to demonstrate the effectiveness  
7 of various high-performance technologies in  
8 each of the 4 climatic regions of the  
9 United States described in subsection  
10 (c)(2)(B); and

11 (v) to explore quantifiable and non-  
12 quantifiable beneficial impacts on public  
13 health and employee and student perform-  
14 ance;

15 (3) demonstration projects to evaluate  
16 replicable approaches to achieving various types of  
17 commercial buildings in various climates; and

18 (4) deployment activities to disseminate infor-  
19 mation on and encourage widespread adoption of  
20 technologies, practices, and policies to achieve zero-  
21 net-energy commercial buildings or low energy use  
22 and effective monitoring of energy use in commercial  
23 buildings.

24 (c) CRITERIA.—

1           (1) FEDERAL FACILITIES.—With respect to the  
2 existing or proposed Federal facility at which a dem-  
3 onstration project under this section is conducted,  
4 the Federal facility shall—

5           (A) be an appropriate model for a project  
6 relating to—

7           (i) the effectiveness of high-perform-  
8 ance technologies;

9           (ii) analysis of materials, components,  
10 systems, and emergency operations in the  
11 building, and the impact of those mate-  
12 rials, components, and systems, including  
13 the impact on the health of building occu-  
14 pants;

15           (iii) life-cycle costing and life-cycle as-  
16 sessment of building materials and sys-  
17 tems; and

18           (iv) location and design that promote  
19 access to the Federal facility through walk-  
20 ing, biking, and mass transit; and

21           (B) possess sufficient technological and or-  
22 ganizational adaptability.

23           (2) UNIVERSITIES.—With respect to the 4 uni-  
24 versities at which a demonstration project under this  
25 section is conducted—

- 1 (A) the universities should be selected,  
2 after careful review of all applications received  
3 containing the required information, as deter-  
4 mined by the Director, based on—
- 5 (i) successful and established public-  
6 private research and development partner-  
7 ships;
  - 8 (ii) demonstrated capabilities to con-  
9 struct or renovate buildings that meet high  
10 indoor environmental quality standards;
  - 11 (iii) organizational flexibility;
  - 12 (iv) technological adaptability;
  - 13 (v) the demonstrated capacity of at  
14 least 1 university to replicate lessons  
15 learned among nearby or sister univer-  
16 sities, preferably by participation in groups  
17 or consortia that promote sustainability;
  - 18 (vi) the demonstrated capacity of at  
19 least 1 university to have officially-adopt-  
20 ed, institution-wide “green building” guide-  
21 lines for all campus building projects; and
  - 22 (vii) the demonstrated capacity of at  
23 least 1 university to have been recognized  
24 by similar institutions as a national leader

1 in sustainability education and curriculum  
2 for students of the university; and

3 (B) each university shall be located in a  
4 different climatic region of the United States,  
5 each of which regions shall have, as determined  
6 by the Office—

7 (i) a hot, dry climate;

8 (ii) a hot, humid climate;

9 (iii) a cold climate; or

10 (iv) a temperate climate (including a  
11 climate with cold winters and humid sum-  
12 mers).

13 (d) REPORT.—Not later than 1 year after the date  
14 of enactment of this Act, and annually thereafter through  
15 September 30, 2014—

16 (1) the Director shall submit to the Secretary  
17 a report that describes the status of the demonstra-  
18 tion projects; and

19 (2) each University at which a demonstration  
20 project under this section is conducted shall submit  
21 to the Secretary a report that describes the status  
22 of the demonstration projects under this section.

1 **SEC. 150. ENERGY EFFICIENCY FOR DATA CENTER BUILD-**  
2 **INGS.**

3 (a) IN GENERAL.—(1) Not later than 90 days after  
4 the date of enactment of this Act, the Secretary of Energy  
5 and Administrator of the Environmental Protection Agen-  
6 cy shall jointly, after consulting with information tech-  
7 nology industry and other interested parties, initiate a vol-  
8 untary national information program for those types of  
9 data centers and data center equipment and facilities that  
10 are widely used and for which there is a potential for sig-  
11 nificant data center energy savings as a result of such pro-  
12 gram.

13 (2) Such program shall—

14 (A) consistent with the objectives of paragraph  
15 (1), determine the type of data center and data cen-  
16 ter equipment and facilities to be covered under such  
17 program; and

18 (B) include specifications, measurements, and  
19 benchmarks that will enable data center operators to  
20 make more informed decisions about the energy effi-  
21 ciency and costs of data centers, and that—

22 (i) reflect the total energy consumption of  
23 data centers, including both equipment and fa-  
24 cilities, taking into account—

1 (I) the performance and utilization of  
2 servers, data storage devices, and other in-  
3 formation technology equipment;

4 (II) the efficiency of heating, ventila-  
5 tion, and air conditioning, cooling, and  
6 power conditioning systems;

7 (III) energy savings from the adoption  
8 of software and data management tech-  
9 niques; and

10 (IV) other factors determined by the  
11 organization described in subsection (b);

12 (ii) allow for creation of separate specifica-  
13 tions, measurements, and benchmarks based on  
14 data center size and function, as well as other  
15 appropriate characteristics determined by the  
16 organization described in subsection (b);

17 (iii) advance the design and implementa-  
18 tion of efficiency technologies to the maximum  
19 extent economically practical; and

20 (iv) provide to data center operators in the  
21 private sector and the Federal Government in-  
22 formation about best practices and purchasing  
23 decisions that reduce the energy consumption of  
24 data centers;

1 (C) publish the information described in sub-  
2 paragraph (B), which may be disseminated through  
3 catalogs, trade publications, the Internet, or other  
4 mechanisms, that will allow data center operators to  
5 assess the energy consumption and potential cost  
6 savings of alternative data centers and data center  
7 equipment and facilities; and

8 (D) not later than 1 year after the date of en-  
9 actment of this Act, and thereafter on an ongoing  
10 basis, transmit the information described in sub-  
11 paragraph (B) to the Secretary and the Adminis-  
12 trator.

13 (3) Such program shall be developed and coordinated  
14 by the data center efficiency organization described in sub-  
15 section (b) according to commonly accepted procedures for  
16 the development of specifications, measurements, and  
17 benchmarks.

18 (b) DATA CENTER EFFICIENCY ORGANIZATION.—  
19 Upon creation of the program under subsection (a), the  
20 Secretary and the Administrator shall jointly designate an  
21 information technology industry organization to coordi-  
22 nate the program. Such organization shall—

23 (1) consist of interested parties that have exper-  
24 tise in energy efficiency and in the development, op-  
25 eration, and functionality of computer data centers,

1 information technology equipment, and software, as  
2 well as representatives of hardware manufacturers,  
3 data center operators, and facility managers;

4 (2) obtain and address input from Department  
5 of Energy National Laboratories or any college, uni-  
6 versity, research institution, industry association,  
7 company, or public interest group with applicable ex-  
8 pertise in any of the areas listed in paragraph (1)  
9 of this subsection;

10 (3) follow commonly accepted procedures for  
11 the development of specifications and accredited  
12 standards development processes;

13 (4) have a mission to develop and promote en-  
14 ergy efficiency for data centers and information  
15 technology; and

16 (5) have the primary responsibility to oversee  
17 the development and publishing of the information,  
18 measurements, and benchmarks described in sub-  
19 section (a) and transmission of such information to  
20 the Secretary and the Administrator for their adop-  
21 tion under subsection (c).

22 (c) ADOPTION OF SPECIFICATIONS.—The Secretary  
23 and the Administrator shall jointly, in accordance with the  
24 requirements of section 12(d) of the National Technology  
25 Transfer Advancement Act of 1995, adopt and publish the

1 specifications, measurements, and benchmarks described  
2 in subsection (a) for use by the Federal Energy Manage-  
3 ment Program and the Energy Star program as energy  
4 efficiency requirements for the purposes of those pro-  
5 grams.

6 (d) MONITORING.—The Secretary and the Adminis-  
7 trator shall jointly monitor and evaluate the efforts to de-  
8 velop the program described in subsection (a) and, not  
9 later than 3 years after the date of enactment of this Act,  
10 shall make a determination as to whether such program  
11 is consistent with the objectives of subsection (a).

12 (e) ALTERNATIVE SYSTEM.—If the Secretary and the  
13 Administrator make a determination under subsection (d)  
14 that a voluntary national information program for data  
15 centers consistent with the objectives of subsection (a) has  
16 not been developed, the Secretary and the Administrator  
17 shall jointly, after consultation with the National Institute  
18 of Standards and Technology, develop, not later than 2  
19 years after such determination, and implement the pro-  
20 gram under subsection (a).

21 (f) PROTECTION OF PROPRIETARY INFORMATION.—  
22 The Secretary, the Administrator, or the data center effi-  
23 ciency organization shall not disclose any proprietary in-  
24 formation or trade secrets provided by any individual or  
25 company for the purposes of carrying out this program.

1 (g) DEFINITIONS.—For purposes of this section:

2 (1) The term “data center” means any facility  
3 that primarily contains electronic equipment used to  
4 process, store, and transmit digital information,  
5 which may be—

6 (A) a free-standing structure; or

7 (B) a facility within a larger structure,  
8 that utilizes environmental control equipment to  
9 maintain the proper conditions for the operation of  
10 electronic equipment.

11 (2) The term “data center operator” means any  
12 person or government entity that builds or operates  
13 a data center or purchases data center services,  
14 equipment, and facilities.

15 **SEC. 151. AUTHORIZATION OF APPROPRIATIONS.**

16 (a) IN GENERAL.—In addition to amounts authorized  
17 under subsections (b) and (c), there are authorized to be  
18 appropriated to carry out this subtitle—

19 (1) \$10,000,000 for fiscal year 2008; and

20 (2) \$20,000,000 for each of the fiscal years  
21 2009 through 2014,

22 to remain available until expended.

23 (b) DEMONSTRATION PROJECTS.—

24 (1) FEDERAL DEMONSTRATION PROJECT.—

25 There are authorized to be appropriated to carry out

1 the Federal demonstration project described in sec-  
2 tion 149(b)(1) \$10,000,000 for the period of fiscal  
3 years 2009 through 2014, to remain available until  
4 expended.

5 (2) UNIVERSITY DEMONSTRATION PROJECTS.—  
6 There are authorized to be appropriated to carry out  
7 the university demonstration projects described in  
8 section 149(b)(2) \$10,000,000 for the period of fis-  
9 cal years 2009 through 2014, to remain available  
10 until expended.

11 (c) ENERGY EFFICIENCY FOR DATA CENTER BUILD-  
12 INGS.—There are authorized to be appropriated to each  
13 of the Secretary and the Administrator for carrying out  
14 section 150 \$250,000 for each of the fiscal years 2008  
15 through 2012.

## 16 **Subtitle E—Industrial Energy**

### 17 **SEC. 161. INDUSTRIAL ENERGY.**

18 (a) AMENDMENT.—Title III of the Energy Conserva-  
19 tion and Policy Act (42 U.S.C. 6201 and following) is  
20 amended by adding the following after part D:

#### 21 **“PART E—INDUSTRIAL ENERGY**

#### 22 **“SEC. 371. SURVEY OF WASTE INDUSTRIAL ENERGY RECOV- 23 **ERY AND POTENTIAL USE.****

24 “Congress finds that\_\_

1           “(1) the Nation should encourage the use of  
2 otherwise wasted energy and the development of  
3 combined heat and power and other waste energy re-  
4 covery projects where there is wasted thermal energy  
5 in large volumes at potentially useful temperatures;

6           “(2) such projects would increase energy effi-  
7 ciency and lower pollution by generating power with  
8 no incremental fossil fuel consumption;

9           “(3) because recovered waste energy and com-  
10 bined heat and power projects are associated with  
11 end-uses of thermal energy and electricity at the  
12 local level, they help avoid new transmission lines,  
13 reduce line losses, reduce local air pollutant emis-  
14 sions, and reduce vulnerability to extreme weather  
15 and terrorism; and

16           “(4) States, localities, electric utilities, and  
17 other electricity customers may benefit from private  
18 investments in recovered waste energy and combined  
19 heat and power projects at industrial and commer-  
20 cial sites by avoiding generation, transmission and  
21 distribution expenses, and transmission line loss ex-  
22 penses that may otherwise be required to be recov-  
23 ered from ratepayers.

24 **“SEC. 372. DEFINITIONS.**

25           “For purposes of this Part:

1           “(1) The term ‘Administrator’ means the Ad-  
2           ministrator of the Environmental Protection Agency.

3           “(2) The term ‘waste energy’ means\_\_

4                   “(A) exhaust heat and flared gases from  
5           any industrial process;

6                   “(B) waste gas or industrial tail gas that  
7           would otherwise be flared, incinerated or vent-  
8           ed;

9                   “(C) a pressure drop in any gas, excluding  
10          any pressure drop to a condenser that subse-  
11          quently vents the resulting heat; and

12                  “(D) such other forms of waste energy as  
13          the Administrator may identify.

14          “(3) The term ‘recoverable waste energy’ means  
15          waste energy from which electricity or useful ther-  
16          mal energy may be recovered through modification  
17          of existing facilities or addition of new facilities.

18                  “(4) The term ‘net excess power’ means, for  
19          any facility, recoverable waste energy recovered in  
20          the form of electricity in amounts exceeding the total  
21          consumption of electricity at the specific time of gen-  
22          eration on the site where the facility is located.

23                  “(5) The term ‘useful thermal energy’ is energy  
24          in the forms of direct heat, steam, hot water, or  
25          other thermal forms that is used in production and

1 beneficial measures for heating, cooling, humidity  
2 control, process use, or other valid thermal end-use  
3 energy requirements, and for which fuel or elec-  
4 tricity would otherwise be consumed.

5 “(6) The term ‘combined heat and power sys-  
6 tem’ means a facility—

7 “(A) that simultaneously and efficiently  
8 produces useful thermal energy and electricity;  
9 and

10 “(B) that recovers not less than 60 percent  
11 of the energy value in the fuel (on a lower-heat-  
12 ing-value basis) in the form of useful thermal  
13 energy and electricity.

14 “(7) The terms ‘electric utility’, ‘State regu-  
15 lated electric utility’, ‘nonregulated electric utility’  
16 and other terms used in this Part have the same  
17 meanings as when such terms are used in title I of  
18 the Public Utility Regulatory Policies Act of 1978  
19 (relating to retail regulatory policies for electric utili-  
20 ties).

21 **“SEC. 373. SURVEY AND REGISTRY.**

22 “(a) RECOVERABLE WASTE-ENERGY INVENTORY  
23 PROGRAM.—The Administrator, in cooperation with State  
24 energy offices, shall establish a Recoverable Waste-Energy  
25 Inventory Program. The program shall include an ongoing

1 survey of all major industrial and large commercial com-  
2 bustion sources in the United States and the sites where  
3 these are located, together with a review of each for quan-  
4 tity and quality of waste energy.

5       “(b) CRITERIA.—The Administrator shall, within 120  
6 days after the enactment of this section, develop and pub-  
7 lish proposed criteria subject to notice and comment, and  
8 within 270 days of enactment, establish final criteria, to  
9 identify and designate those sources and sites in the inven-  
10 tory under subsection (a) where recoverable waste energy  
11 projects or combined heat and power system projects may  
12 have economic feasibility with a payback of invested costs  
13 within 5 years or less from the date of first full project  
14 operation (including incentives offered under this Part).  
15 Such criteria will include standards that insure that  
16 projects proposed for inclusion in the Registry are not de-  
17 veloped for the primary purpose of making sales of excess  
18 electric power under the regulatory treatment provided  
19 under this Part.

20       “(c) TECHNICAL SUPPORT.—The Administrator shall  
21 provide to owners or operators of combustion sources tech-  
22 nical support and offer partial funding (up to one-half of  
23 total costs) for feasibility studies to confirm whether or  
24 not investment in recovery of waste energy or combined

1 heat and power at that source would offer a payback pe-  
2 riod of 5 years or less.

3 “(d) REGISTRY.—(1) The Administrator shall, within  
4 one year after the enactment of this section, establish a  
5 Registry of Recoverable Waste-energy Sources, and sites  
6 on which those sources are located, which meet the criteria  
7 set forth under subsection (b). The Administrator shall  
8 update the Registry on not less than a monthly basis, and  
9 make the Registry accessible to the public on the Environ-  
10 mental Protection Agency web site. Any State or electric  
11 utility may contest the listing of any source or site by sub-  
12 mitting a petition to the Administrator.

13 “(2) The Administrator shall register and include on  
14 the Registry all sites meeting the criteria of subsection (b).  
15 The Administrator shall calculate the total amounts of po-  
16 tentially recoverable waste energy from sources at such  
17 sites, nationally and by State, and shall make such totals  
18 public, together with information on the air pollutant and  
19 greenhouse gas emissions savings that might be achieved  
20 with recovery of the waste energy from all sources and  
21 sites listed in the Registry.

22 “(3) The Administrator shall notify owners or opera-  
23 tors of Recoverable Waste-Energy Sources and sites listed  
24 in the Registry prior to publishing the listing. The owner  
25 or operator of sources at such sites may elect to have de-

1 tailed quantitative information concerning that site not  
2 made public by notifying the Administrator of that elec-  
3 tion. Information concerning that site shall be included in  
4 State totals unless there are fewer than 3 sites in the  
5 State.

6 “(4) As waste energy projects achieve successful re-  
7 covery of waste energy, the Administrator shall remove the  
8 related sites or sources from the Registry, and shall des-  
9 ignate the removed projects as eligible for the incentive  
10 provisions provided under this Part and the regulatory  
11 treatment required by this Part. No project shall be re-  
12 moved from the Registry without the consent of the owner  
13 or operator of the project if the owner or operator has  
14 submitted a petition under section 375 and such petition  
15 has not been acted upon or denied.

16 “(5) The Administrator shall not list any source con-  
17 structed after the date of the enactment of this Part on  
18 the Registry if the Administrator determines that such  
19 source—

20 “(A) was developed for the primary purpose of  
21 making sales of excess electric power under the reg-  
22 ulatory treatment provided under this Part; or

23 “(B) does not capture at least 60 percent of the  
24 total energy value of the fuels used (on a lower-heat-  
25 ing-value basis) in the form of useful thermal en-

1       ergy, electricity, mechanical energy, chemical output,  
2       or some combination of them.

3       “(e) SELF-CERTIFICATION.—Owners, operators, or  
4 third-party developers of industrial waste-energy projects  
5 that qualify under standards established by the Adminis-  
6 trator may self-certify their sites or sources to the Admin-  
7 istrator for inclusion in the Registry, subject to procedures  
8 adopted by the Administrator. To prevent a fraudulent  
9 listing, the sources shall be included on the Registry only  
10 if the Administrator confirms the submitted data, at the  
11 Administrator’s discretion.

12       “(f) NEW FACILITIES.—As a new energy-consuming  
13 industrial facility is developed after the enactment of this  
14 Part, to the extent it may constitute a site with recover-  
15 able waste energy that may qualify for the Registry, the  
16 Administrator may elect to include it in the Registry at  
17 the request of its owner or operator or developer on a con-  
18 ditional basis, removing the site if its development ceases  
19 or it if fails to qualify for listing under this Part.

20       “(g) OPTIMUM MEANS OF RECOVERY.—For each site  
21 listed in the Registry, at the request of the owner or oper-  
22 ator of the site, the Administrator shall offer, in coopera-  
23 tion with Clean Energy Application Centers operated by  
24 the Secretary of Energy, suggestions of optimum means  
25 of recovery of value from waste energy stream in the form

1 of electricity, useful thermal energy, or other energy-re-  
2 lated products.

3 “(h) REVISION.—Each annual State report under  
4 section 548(a) of the National Energy Conservation Policy  
5 Act shall include the results of the survey for that State  
6 under this section.

7 “(i) AUTHORIZATION.—There are authorized to be  
8 appropriated to the Administrator for the purposes of cre-  
9 ating and maintaining the Registry and services author-  
10 ized by this section not more than \$1,000,000 for each  
11 of fiscal years 2008, 2009, 2010, 2010, and 2012 and not  
12 more than \$5,000,000 to the States to provide funding  
13 for State energy office functions under this section .

14 **“SEC. 374. WASTE ENERGY RECOVERY INCENTIVE GRANT**  
15 **PROGRAM.**

16 “(a) ESTABLISHMENT OF PROGRAM.—There is es-  
17 tablished in the Environmental Protection Agency a Waste  
18 Energy Recovery Incentive Grant Program to provide in-  
19 centive grants to owners and operators of projects that  
20 successfully produce electricity or incremental useful ther-  
21 mal energy from waste energy recovery (and to utilities  
22 purchasing or distributing such electricity) and to reward  
23 States that have achieved 80 percent or more of identified  
24 waste-heat recovery opportunities.

25 “(b) GRANTS TO PROJECTS AND UTILITIES.—

1           “(1) IN GENERAL.—The Administrator shall  
2           make grants to the owners or operators of waste en-  
3           ergy recovery projects, and, in the case of excess  
4           power purchased or transmitted by a electric utility,  
5           to such utility. Grants may only be made upon re-  
6           ceipt of proof of waste energy recovery or excess  
7           electricity generation, or both, from the project in a  
8           form prescribed by the Administrator, by rule.

9           “(2) EXCESS ELECTRIC ENERGY.—In the case  
10          of waste energy recovery, the grants under this sec-  
11          tion shall be made at the rate of \$10 per megawatt  
12          hour of documented electricity produced from recov-  
13          ered waste energy (or by prevention of waste energy  
14          in the case of a new facility) by the project during  
15          the first 3 calendar years of such production, begin-  
16          ning on or after the date of enactment of this Part.  
17          If the project produces net excess power and an elec-  
18          tric utility purchases or transmits the excess power,  
19          50 percent of so much of such grant as is attrib-  
20          utable to the net excess power shall be paid to the  
21          electric utility purchasing or transporting the net ex-  
22          cess power.

23          “(3) USEFUL THERMAL ENERGY.—In the case  
24          of waste energy recovery that produces useful ther-  
25          mal energy that is used for a purpose different from

1       that for which the project is principally designed, the  
2       grants under this section shall be made to the owner  
3       or operator of the waste energy recovery project at  
4       the rate of \$10 for each 3,412,000 Btus of such ex-  
5       cess thermal energy used for such different purpose.

6       “(c) GRANTS TO STATES.—In the case of States that  
7       have achieved 80 percent or more of waste-heat recovery  
8       opportunities identified by the Administrator under this  
9       Part, the Administrator shall make grants to the States  
10      of up to \$1,000 per Megawatt of waste-heat capacity re-  
11      covered (or its thermal equivalent) to support State-level  
12      programs to identify and achieve additional energy effi-  
13      ciency.

14      “(d) ELIGIBILITY.—The Administrator shall estab-  
15      lish rules and guidelines to establish eligibility for grants,  
16      shall make the grant program known to those listed in  
17      the Registry, and shall offer such grants on the basis of  
18      the merits of each project in recovering or preventing  
19      waste energy throughout the United States on an impar-  
20      tial, objective, and not unduly discriminatory basis.

21      “(e) AUTHORIZATION.—(1) There is authorized to be  
22      appropriated to the Administrator \$100,000,000 for fiscal  
23      year 2008, and \$200,000,000 for each of fiscal years  
24      2009, 2010, 2011, and 2012 for grants under subsection  
25      (b) of this section, and such additional amounts during

1 those years and thereafter as may be necessary for admin-  
2 istration of the Waste Energy Recovery Incentive Grant  
3 Program.

4 “(2) There is authorized to be appropriated to the  
5 Administrator not more than \$10,000,000 for each of the  
6 first five fiscal years after the enactment of this Part, to  
7 be available until expended for purposes of grants to  
8 States under subsection (c).

9 **“SEC. 375. ADDITIONAL INCENTIVES FOR RECOVERY, UTILI-**  
10 **ZATION AND PREVENTION OF INDUSTRIAL**  
11 **WASTE ENERGY.**

12 “(a) CONSIDERATION OF STANDARD.—Not later  
13 than 180 days after the receipt by a State regulatory au-  
14 thority (with respect to each electric utility for which it  
15 has ratemaking authority), or nonregulated electric utility,  
16 of a request from a project sponsor or owner or operator,  
17 the State regulatory authority or nonregulated electric  
18 utility shall provide public notice and conduct a hearing  
19 respecting the standard established by subsection (c) and,  
20 on the basis of such hearing, shall consider and make a  
21 determination whether or not it is appropriate to imple-  
22 ment such standard to carry out the purposes of this Part.  
23 For purposes of any such determination and any review  
24 of such determination in any court the purposes of this  
25 section supplement otherwise applicable State law. Noth-

1 ing in this section prohibits any State regulatory authority  
2 or nonregulated electric utility from making any deter-  
3 mination that it is not appropriate to adopt any such  
4 standard, pursuant to its authority under otherwise appli-  
5 cable State law.

6 “(b) STANDARD FOR SALES OF EXCESS POWER.—  
7 For purposes of this section, the standard referred to in  
8 subsection (a) shall provide that an owner or operator of  
9 a waste energy recovery project identified on the Registry  
10 who generates net excess power shall be eligible to benefit  
11 from at least one of the options described in subsection  
12 (c) for disposal of the net excess power in accordance with  
13 the rate conditions and limitations described in subsection  
14 (d).

15 “(c) OPTIONS.—The options referred to in subsection  
16 (b) are as follows:

17 “(1) SALE OF NET EXCESS POWER TO UTIL-  
18 ITY.—The electric utility shall purchase the net ex-  
19 cess power from the owner or operator of the eligible  
20 waste-energy recovery project during the operation  
21 of the project under a contract entered into for that  
22 purpose.

23 “(2) TRANSPORT BY UTILITY FOR DIRECT SALE  
24 TO THIRD PARTY.—The electric utility shall transmit  
25 the net excess power on behalf of the project owner

1 or operator to up to three separate locations on that  
2 utility's system for direct sale by that owner or oper-  
3 ator to third parties at such locations.

4 “(3) TRANSPORT OVER PRIVATE TRANSMISSION  
5 LINES.—The State and the electric utility shall per-  
6 mit, and shall waive or modify such laws as would  
7 otherwise prohibit, the construction and operation of  
8 private electric wires constructed, owned and oper-  
9 ated by the project owner or operator, to transport  
10 such power to up to 3 purchasers within a 3-mile ra-  
11 dius of the project, allowing such wires to utilize or  
12 cross public rights-of-way, without subjecting the  
13 project to regulation as a public utility, and accord-  
14 ing such wires the same treatment for safety, zon-  
15 ing, land-use and other legal privileges as apply or  
16 would apply to the utility's own wires, except that —

17 “(A) there shall be no grant of any power  
18 of eminent domain to take or cross private  
19 property for such wires, and

20 “(B) such wires shall be physically seg-  
21 regated and not interconnected with any portion  
22 of the utility's system, except on the customer's  
23 side of the utility's revenue meter and in a  
24 manner that precludes any possible export of

1           such electricity onto the utility system, or dis-  
2           ruption of such system.

3           “(4) AGREED UPON ALTERNATIVES.—The util-  
4           ity and the owner or operator of the project may  
5           reach agreement on any alternate arrangement and  
6           its associated payments or rates that is mutually  
7           satisfactory and in accord with State law.

8           “(d) RATE CONDITIONS AND CRITERIA.—

9           “(1) IN GENERAL.—The options described in  
10          paragraphs (1) and (2) in subsection (c) shall be of-  
11          fered under purchase and transport rate conditions  
12          reflecting the rate components defined under para-  
13          graph (2) of this subsection as applicable under the  
14          circumstances described in paragraph (3) of this  
15          subsection.

16          “(2) RATE COMPONENTS.—For purposes of this  
17          section:

18                 “(A) PER UNIT DISTRIBUTION COSTS.—  
19                 The term ‘per unit distribution costs’ means the  
20                 utility’s depreciated book-value distribution sys-  
21                 tem costs divided by the previous year’s volume  
22                 of utility electricity sales or transmission at the  
23                 distribution level in kilowatt hours.

24                 “(B) PER UNIT DISTRIBUTION MARGIN.—  
25                 The term ‘per unit distribution margin’ means:

1           “(i) In the case of a State regulated  
2           electric utility, a per-unit gross pretax  
3           profit determined by multiplying the util-  
4           ity’s State-approved percentage rate of re-  
5           turn for distribution system assets by the  
6           per unit distribution costs.

7           “(ii) In the case of an nonregulated  
8           utility, a per unit contribution to net reve-  
9           nues determined by dividing the amount of  
10          any net revenue payment or contribution  
11          to the nonregulated utility’s owners or sub-  
12          scribers in the prior year by the utility’s  
13          gross revenues for the prior year to obtain  
14          a percentage (but not less than 10 percent)  
15          and multiplying that percentage by the per  
16          unit distribution costs.

17          “(C) PER UNIT TRANSMISSION COSTS.—  
18          The term ‘per unit transmission costs’ means  
19          the total cost of those transmission services  
20          purchased or provided by a utility on a per-kilo-  
21          watt-hour basis as included in that utility’s re-  
22          tail rate.

23          “(3) APPLICABLE RATES.—

24                 “(A) RATES APPLICABLE TO SALE OF NET  
25          EXCESS POWER.—Sales made by a project

1 owner or operator under the option described in  
2 subsection (c) (1) shall be paid for on a per kil-  
3 owatt hour basis that shall equal the full  
4 undiscounted retail rate paid to the utility for  
5 power purchased by such a facility *minus* per  
6 unit distribution costs, as applicable to the type  
7 of utility purchasing the power. If the net ex-  
8 cess power is made available for purchase at  
9 voltages that must be transformed to or from  
10 voltages exceeding 25 kilovolts to be available  
11 for resale by the utility, then the purchase price  
12 shall further be reduced by per unit trans-  
13 mission costs.

14 “(B) RATES APPLICABLE TO TRANSPORT  
15 BY UTILITY FOR DIRECT SALE TO THIRD PAR-  
16 TIES.—Transportation by utilities of power on  
17 behalf of the owner or operator of a project  
18 under the option described in subsection (c)(2)  
19 shall incur a transportation rate equal to the  
20 per unit distribution costs and per unit dis-  
21 tribution margin, as applicable to the type of  
22 utility transporting the power. If the net excess  
23 power is made available for transportation at  
24 voltages that must be transformed to or from  
25 voltages exceeding 25 kilovolts to be trans-

1           ported to the designated third-party purchasers,  
2           then the transport rate shall further be in-  
3           creased by per unit transmission costs. In  
4           States with competitive retail markets for elec-  
5           tricity, the applicable transportation rate for  
6           similar transportation shall be applied in lieu of  
7           any rate calculated under this paragraph.

8           “(4) LIMITATIONS.—(A) Any rate established  
9           for sale or transportation under this section shall be  
10          modified over time with changes in the electric util-  
11          ity’s underlying costs or rates, and shall reflect the  
12          same time-sensitivity and billing periods as are es-  
13          tablished in the retail sales or transportation rates  
14          offered by the utility.

15          “(B) No utility shall be required to purchase or  
16          transport an amount of net excess power under this  
17          section that exceeds the capacity of the wires, meter,  
18          or other equipment of the electric utility serving the  
19          site unless the owner or operator of the project  
20          agrees to pay necessary and reasonable upgrade  
21          costs.

22          “(e) PROCEDURAL REQUIREMENTS FOR CONSIDER-  
23          ATION AND DETERMINATION.—(1) The consideration re-  
24          ferred to in subsection (b) shall be made after public no-

1 tice and hearing. The determination referred to in sub-  
2 section (b) shall be—

3 “(A) in writing,

4 “(B) based upon findings included in such de-  
5 termination and upon the evidence presented at the  
6 hearing, and

7 “(C) available to the public.

8 “(2) The Administrator may intervene as a matter  
9 of right in a proceeding conducted under this section and  
10 may calculate the energy and emissions likely to be saved  
11 by electing to adopt one or more of the options, as well  
12 as the costs and benefits to ratepayers and the utility and  
13 to advocate for the waste-energy recovery opportunity.

14 “(3) Except as otherwise provided in paragraph (1),  
15 and paragraph (2), the procedures for the consideration  
16 and determination referred to in subsection (a) shall be  
17 those established by the State regulatory authority or the  
18 nonregulated electric utility. In the instance that there is  
19 more than one project seeking such consideration simulta-  
20 neously in connection with the same utility, such pro-  
21 ceeding may encompass all such projects, provided that  
22 full attention is paid to their individual circumstances and  
23 merits, and an individual judgment is reached with respect  
24 to each project.

1           “(f) IMPLEMENTATION.—(1) The State regulatory  
2 authority (with respect to each electric utility for which  
3 it has ratemaking authority) or nonregulated electric util-  
4 ity may, to the extent consistent with otherwise applicable  
5 State law—

6           “(A) implement the standard determined under  
7 this section, or

8           “(B) decline to implement any such standard.

9           “(2) If a State regulatory authority (with respect to  
10 each electric utility for which it has ratemaking authority)  
11 or nonregulated electric utility declines to implement any  
12 standard established by this section, such authority or  
13 nonregulated electric utility shall state in writing the rea-  
14 sons therefor. Such statement of reasons shall be available  
15 to the public, and the Administrator shall include the  
16 project in an annual report to Congress concerning lost  
17 opportunities for waste-heat recovery, specifically identi-  
18 fying the utility and stating the amount of lost energy and  
19 emissions savings calculated. If a State regulatory author-  
20 ity (with respect to each electric utility for which it has  
21 ratemaking authority) or nonregulated electric utility de-  
22 clines to implement the standard established by this sec-  
23 tion, the project sponsor may submit a new petition under  
24 this section with respect to such project at any time after  
25 24 months after the date on which the State regulatory

1 authority or nonregulated utility has declined to imple-  
2 ment such standard.

3 **“SEC. 376. CLEAN ENERGY APPLICATION CENTERS.**

4 “(a) PURPOSE.—The purpose of this section is to re-  
5 name and provide for the continued operation of the  
6 United States Department of Energy’s Regional Com-  
7 bined Heat and Power (CHP) Application Centers.

8 “(b) FINDINGS.—The Congress finds the Depart-  
9 ment of Energy’s Regional Combined Heat and Power  
10 (CHP) Application Centers program has produced signifi-  
11 cant energy savings and climate change benefits and will  
12 continue to do so through the deployment of clean energy  
13 technologies such as Combined Heat and Power (CHP),  
14 recycled waste energy and biomass energy systems, in the  
15 industrial and commercial energy markets.

16 “(c) RENAMING.—The Combined Heat and Power  
17 Application Centers at the Department of Energy are  
18 hereby be redesignated as Clean Energy Application Cen-  
19 ters. Any reference in any law, rule or regulation or publi-  
20 cation to the Combined Heat and Power Application Cen-  
21 ters shall be treated as a reference to the Clean Energy  
22 Application Centers.

23 “(d) RELOCATION.—In order to better coordinate ef-  
24 forts with the separate Industrial Assessment Centers and  
25 to assure that the energy efficiency and, when applicable,

1 the renewable nature of deploying mature clean energy  
2 technology is fully accounted for, the Secretary of Energy  
3 shall relocate the administration of the Clean Energy Ap-  
4 plication Centers to the Office of Energy Efficiency and  
5 Renewable Energy within the Department of Energy. The  
6 Office of Electricity Delivery and Energy Reliability shall  
7 continue to perform work on the role of such technology  
8 in support of the grid and its reliability and security, and  
9 shall assist the Clean Energy Application Centers in their  
10 work with regard to the grid and with electric utilities.

11 “(e) GRANTS.—

12 “(1) IN GENERAL.—The Secretary of Energy  
13 shall make grants to universities, research centers,  
14 and other appropriate institutions to assure the con-  
15 tinued operations and effectiveness of 8 Regional  
16 Clean Energy Application Centers in each of the fol-  
17 lowing regions (as designated for such purposes as  
18 of the date of the enactment of this section):

19 “(A) Gulf Coast.

20 “(B) Intermountain.

21 “(C) Mid-Atlantic.

22 “(D) Midwest.

23 “(E) Northeast.

24 “(F) Northwest.

25 “(G) Pacific.

1                   “(H) Southeast.

2                   “(2) ESTABLISHMENT OF GOALS AND COMPLI-  
3 ANCE.—In making grants under this section, the  
4 Secretary shall ensure that sufficient goals are es-  
5 tablished and met by each Center throughout the  
6 program duration concerning outreach and tech-  
7 nology deployment.

8                   “(f) ACTIVITIES.—Each Clean Energy Application  
9 Center shall operate a program to encourage deployment  
10 of clean energy technologies through education and out-  
11 reach to building and industrial professionals, and to other  
12 individuals and organizations with an interest in efficient  
13 energy use. In addition, the Centers shall provide project  
14 specific support to building and industrial professionals  
15 through assessments and advisory activities. Funds made  
16 available under this section may be used for the following  
17 activities:

18                   “(1) Developing and distributing informational  
19 materials on clean energy technologies, including  
20 continuation of the eight existing Web sites.

21                   “(2) Developing and conducting target market  
22 workshops, seminars, internet programs and other  
23 activities to educate end users, regulators, and  
24 stakeholders in a manner that leads to the deploy-  
25 ment of clean energy technologies.

1           “(3) Providing or coordinating onsite assess-  
2           ments for sites and enterprises that may consider  
3           deployment of clean energy technology.

4           “(4) Performing market research to identify  
5           high profile candidates for clean energy deployment.

6           “(5) Providing consulting support to sites con-  
7           sidering deployment of clean energy technologies.

8           “(6) Assisting organizations developing clean  
9           energy technologies to overcome barriers to deploy-  
10          ment.

11          “(g) DURATION.—A grant awarded under this sec-  
12          tion shall be for a period of 5 years. each grant shall be  
13          evaluated annually for its continuation based on its activi-  
14          ties and results.

15          “(h) AUTHORIZATION.—There is authorized to be ap-  
16          propriated for purposes of this section the sum of  
17          \$10,000,000 for each of fiscal years 2008, 2009, 2010,  
18          2011, and 2012.”.

19          (b) TABLE OF CONTENTS.—The table of contents for  
20          such Act is amended by inserting the following after the  
21          items relating to part D of title III:

“PART E—INDUSTRIAL ENERGY

“Sec. 371. Survey of waste industrial energy recovery and potential use.

“Sec. 372. Definitions.

“Sec. 373. Survey and registry.

“Sec. 374. Incentives for recovery, utilization and prevention of industrial waste  
energy.

“Sec. 375. Clean Energy Application Centers.”.

1     **Subtitle F—Energy Efficiency of**  
2                   **Public Institutions**

3     **SEC. 171. SHORT TITLE.**

4           This subtitle may be cited as the “Sustainable En-  
5     ergy Institutional Infrastructure Act of 2007”.

6     **SEC. 172. FINDINGS.**

7           The Congress finds the following:

8                   (1) Many institutional entities own and operate,  
9                   or are served by, district energy systems.

10                   (2) A variety of renewable energy resources  
11                   could be tapped by governmental and institutional  
12                   energy systems to meet energy requirements.

13                   (3) Use of these renewable energy resources to  
14                   meet energy requirements will reduce reliance on  
15                   fossil fuels and the associated emissions of air pollu-  
16                   tion and carbon dioxide.

17                   (4) CHP is a highly efficient and environ-  
18                   mentally beneficial means to generate electric energy  
19                   and heat, and offers total efficiency much greater  
20                   than conventional separate systems, where electric  
21                   energy is generated at and transmitted long dis-  
22                   tances from a centrally located generation facility,  
23                   and onsite heating and cooling equipment is used to  
24                   meet nonelectric energy requirements.

1           (5) Heat recovered in a CHP generation system  
2           can be used for space heating, domestic hot water,  
3           or process steam requirements, or can be converted  
4           to cooling energy to meet air conditioning require-  
5           ments.

6           (6) The increased efficiency of CHP results in  
7           reduction in emissions of air pollution and carbon di-  
8           oxide.

9           (7) District energy systems represent a key op-  
10          portunity for expanding implementation of CHP be-  
11          cause district energy systems provide a means of de-  
12          livering thermal energy from CHP to a substantial  
13          base of end users.

14          (8) District energy systems help cut peak power  
15          demand and reduce power transmission and distribu-  
16          tion system constraints by meeting air conditioning  
17          demand through delivery of chilled water produced  
18          with CHP-generated heat or other energy sources,  
19          shifting power demand through thermal storage,  
20          and, with CHP, generating power near load centers.

21          (9) Evaluation and implementation of sustain-  
22          able energy infrastructure is a complex undertaking  
23          involving a variety of technical, economic, legal, and  
24          institutional issues and barriers, and technical as-

1       sistance is often required to successfully navigate  
2       these barriers.

3               (10) The major constraint to significant expansion  
4       of sustainable energy infrastructure by institutional  
5       entities is a lack of capital funding for implementation.  
6       

7       **SEC. 173. DEFINITIONS.**

8       For purposes of this subtitle—

9               (1) the term “CHP” means combined heat and  
10       power, or the generation of electric energy and heat  
11       in a single, integrated system;

12              (2) the term “district energy systems” means  
13       systems providing thermal energy to buildings and  
14       other energy consumers from one or more plants to  
15       individual buildings to provide space heating, air  
16       conditioning, domestic hot water, industrial process  
17       energy, and other end uses;

18              (3) the term “institutional entities” means local  
19       governments, public school districts, municipal utilities,  
20       State governments, Federal agencies, and other  
21       entities established by local, State, or Federal agencies  
22       to meet public purposes, and public or private  
23       colleges, universities, airports, and hospitals;

24              (4) the term “renewable thermal energy  
25       sources” means non-fossil-fuel energy sources, in-

1 including biomass, geothermal, solar, natural sources  
2 of cooling such as cold lake or ocean water, and  
3 other sources that can provide heating or cooling en-  
4 ergy;

5 (5) the term “sustainable energy infrastruc-  
6 ture” means facilities for production of energy from  
7 CHP or renewable thermal energy sources and dis-  
8 tribution of thermal energy to users; and

9 (6) the term “thermal energy” means heating  
10 or cooling energy in the form of hot water or steam  
11 (heating energy) or chilled water (cooling energy).

12 **SEC. 174. TECHNICAL ASSISTANCE PROGRAM.**

13 (a) ESTABLISHMENT.—The Secretary of Energy  
14 shall, with funds appropriated for this purpose, implement  
15 a program of information dissemination and technical as-  
16 sistance to institutional entities to assist them in identi-  
17 fying, evaluating, designing, and implementing sustainable  
18 energy infrastructure.

19 (b) INFORMATION DISSEMINATION.—The Secretary  
20 shall develop and disseminate information and assessment  
21 tools addressing—

22 (1) identification of opportunities for sustain-  
23 able energy infrastructure;

24 (2) technical and economic characteristics of  
25 sustainable energy infrastructure;

1           (3) utility interconnection, and negotiation of  
2 power and fuel contracts;

3           (4) financing alternatives;

4           (5) permitting and siting issues;

5           (6) case studies of successful sustainable energy  
6 infrastructure systems; and

7           (7) computer software for assessment, design,  
8 and operation and maintenance of sustainable en-  
9 ergy infrastructure systems.

10       (c) ELIGIBLE COSTS.—Upon application by an insti-  
11 tutional entity, the Secretary may make grants to such  
12 applicant to fund—

13           (1) 75 percent of the cost of feasibility studies  
14 to assess the potential for implementation or im-  
15 provement of sustainable energy infrastructure;

16           (2) 60 percent of the cost of guidance on over-  
17 coming barriers to project implementation, including  
18 financial, contracting, siting, and permitting bar-  
19 riers; and

20           (3) 45 percent of the cost of detailed engineer-  
21 ing and design of sustainable energy infrastructure.

22       (d) AUTHORIZATION OF APPROPRIATIONS.—There  
23 are authorized to be appropriated to carry out this section  
24 \$15,000,000 for fiscal year 2008, \$15,000,000 for fiscal  
25 year 2009, and \$15,000,000 for fiscal year 2010.

1 **SEC. 175. REVOLVING FUND.**

2 (a) ESTABLISHMENT.—The Secretary of Energy  
3 shall, with funds appropriated for this purpose, create a  
4 Sustainable Institutions Revolving Fund for the purpose  
5 of establishing and operating a Sustainable Institutions  
6 Revolving Fund (in this section referred to as the  
7 “SIRF”) for the purpose of providing loans for the con-  
8 struction or improvement of sustainable energy infrastruc-  
9 ture to serve institutional entities.

10 (b) ELIGIBLE COSTS.—A loan provided from the  
11 SIRF shall be for no more than 70 percent of the total  
12 capital costs of a project, and shall not exceed  
13 \$15,000,000. Such loans shall be for constructing sustain-  
14 able energy infrastructure, including—

15 (1) plant facilities used for producing thermal  
16 energy, electricity, or both;

17 (2) facilities for storing thermal energy;

18 (3) facilities for distribution of thermal energy;

19 and

20 (4) costs for converting buildings to use ther-  
21 mal energy from sustainable energy sources.

22 (c) QUALIFICATIONS.—Loans from the SIRF may be  
23 made to institutional entities for projects meeting the  
24 qualifications and conditions established by the Secretary,  
25 including the following minimum qualifications:

1           (1) The project shall be technically and eco-  
2           nomicallly feasible as determined by a detailed feasi-  
3           bility analysis performed or corroborated by an inde-  
4           pendent consultant.

5           (2) The borrower shall demonstrate that ade-  
6           quate and comparable financing was not found to be  
7           reasonably available from other sources, and that  
8           the project is economically more feasible with the  
9           availability of the SIRF loan.

10          (3) The borrower shall obtain commitments for  
11          the remaining capital required to implement the  
12          project, contingent on approval of the SIRF loan.

13          (4) The borrower shall provide to the Secretary  
14          reasonable assurance that all laborers and mechanics  
15          employed by contractors or subcontractors in the  
16          performance of construction work financed in whole  
17          or in part with a loan provided under this section  
18          will be paid wages at rates not less than those pre-  
19          vailing on similar work in the locality as determined  
20          by the Secretary of Labor in accordance with sub-  
21          chapter IV of chapter 31 of title 40, United States  
22          Code (commonly referred to as the Davis-Bacon  
23          Act).

24          (d) FINANCING TERMS.—(1) Interest on a loan under  
25          this section may be a fixed rate or floating rate, and shall

1 be equal to the Federal cost of funds consistent with the  
2 loan type and term, minus 1.5 percent.

3 (2) Interest shall accrue from the date of the loan,  
4 but the first payment of interest shall be deferred, if de-  
5 sired by the borrower, for a period ending not later than  
6 3 years after the initial date of operation of the system.

7 (3) Interest attributable to the period of deferred  
8 payment shall be amortized over the remainder of the loan  
9 term.

10 (4) Principal shall be repaid on a schedule established  
11 at the time the loan is made. Such payments shall begin  
12 not later than 3 years after the initial date of operation  
13 of the system.

14 (5) Loans made from the SIRF shall be repayable  
15 over a period ending not more than 20 years after the  
16 date the loan is made.

17 (6) Loans shall be prepayable at any time without  
18 penalty.

19 (7) SIRF loans shall be subordinate to other loans  
20 for the project.

21 (e) FUNDING CYCLES.—Applications for loans from  
22 the SIRF shall be received on a periodic basis at least  
23 semiannually.

24 (f) APPLICATION OF REPAYMENTS FOR DEFICIT RE-  
25 DUCTION.—Loans from the SIRF shall be made, with

1 funds available for this purpose, during the 10 years start-  
2 ing from the date that the first loan from the fund is  
3 made. Until this 10-year period ends, funds repaid by bor-  
4 rowers shall be deposited in the SIRF to be made available  
5 for additional loans. Once loans from the SIRF are no  
6 longer being made, repayments shall go directly into the  
7 United States Treasury.

8 (g) PRIORITIES.—In evaluating projects for funding,  
9 priority shall be given to projects which—

10 (1) maximize energy efficiency;

11 (2) minimize environmental impacts, including  
12 from regulated air pollutants, greenhouse gas emis-  
13 sions, and the use of refrigerants known to cause  
14 ozone depletion;

15 (3) use renewable energy resources;

16 (4) maximize oil displacement; and

17 (5) benefit economically-depressed areas.

18 (h) REGULATIONS.—Not later than one year after  
19 the date of enactment of this Act, the Secretary of Energy  
20 shall develop a plan and adopt rules and procedures for  
21 establishing and operating the SIRF.

22 (i) PROGRAM REVIEW.—Every two years the Sec-  
23 retary shall report to the Congress on the status and  
24 progress of the SIRF.

1 (j) AUTHORIZATION OF APPROPRIATIONS.—There  
2 are authorized to be appropriated to carry out this section  
3 \$250,000,000 for fiscal year 2008 and \$500,000,000 for  
4 each of the fiscal years 2009 through 2012.

5 **SEC. 176. REAUTHORIZATION OF STATE ENERGY PRO-**  
6 **GRAMS.**

7 Section 365(f) of the Energy Policy and Conservation  
8 Act (42 U.S.C. 6325(f)) is amended by striking  
9 “\$100,000,000 for each of the fiscal years 2006 and 2007  
10 and \$125,000,000 for fiscal year 2008” and inserting  
11 “\$125,000,000 for each of the fiscal years 2007, 2008,  
12 2009, 2010, 2011, and 2012”.

13 **Subtitle G—Energy Savings**  
14 **Performance Contracting**

15 **SEC. 181. DEFINITION OF ENERGY SAVINGS.**

16 Section 804(2) of the National Energy Conservation  
17 Policy Act (42 U.S.C. 8287c(2)) is amended—

18 (1) by redesignating subparagraphs (A), (B),  
19 and (C) as clauses (i), (ii), and (iii), respectively,  
20 and indenting appropriately;

21 (2) by striking “means a reduction” and insert-  
22 ing “means—

23 “(A) a reduction”;

24 (3) by striking the period at the end and insert-  
25 ing a semicolon; and

1 (4) by adding at the end the following:

2 “(B) the increased efficient use of an exist-  
3 ing energy source by cogeneration or heat re-  
4 covery, and installation of renewable energy sys-  
5 tems;

6 “(C) if otherwise authorized by Federal or  
7 State law (including regulations), the sale or  
8 transfer of electrical or thermal energy gen-  
9 erated onsite but in excess of Federal needs, to  
10 utilities or non-Federal energy users; and

11 “(D) the increased efficient use of existing  
12 water sources in interior or exterior applica-  
13 tions.”.

14 **SEC. 182. FINANCING FLEXIBILITY.**

15 Section 801(a)(2) of the National Energy Conserva-  
16 tion Policy Act (42 U.S.C. 8287(a)(2)) is amended by add-  
17 ing at the end the following:

18 “(E) SEPARATE CONTRACTS.—In carrying out a con-  
19 tract under this title, a Federal agency may—

20 “(i) enter into a separate contract for energy  
21 services and conservation measures under the con-  
22 tract; and

23 “(ii) provide all or part of the financing nec-  
24 essary to carry out the contract.”.

1 **SEC. 183. AUTHORITY TO ENTER INTO CONTRACTS; RE-**  
2 **PORTS.**

3 (a) **AUTHORITY TO ENTER INTO CONTRACTS.**—Sec-  
4 tion 801(a)(2)(D) of the National Energy Conservation  
5 Policy Act (42 U.S.C. 8287(a)(2)(D)) is amended—

6 (1) in clause (ii), by inserting “and” after the  
7 semicolon at the end;

8 (2) by striking clause (iii); and

9 (3) by redesignating clause (iv) as clause (iii).

10 (b) **REPORTS.**—Section 548(a)(2) of the National  
11 Energy Conservation Policy Act (42 U.S.C. 8258(a)(2)))  
12 is amended by inserting “and any termination penalty ex-  
13 posure” after “the energy and cost savings that have re-  
14 sulted from such contracts”.

15 (c) **CONFORMING AMENDMENT.**—Section 2913 of  
16 title 10, United States Code is amended by striking sub-  
17 section (e).

18 **SEC. 184. PERMANENT REAUTHORIZATION.**

19 Section 801 of the National Energy Conservation  
20 Policy Act (42 U.S.C. 8287) is amended by striking sub-  
21 section (c).

22 **SEC. 185. TRAINING FEDERAL CONTRACTING OFFICERS TO**  
23 **NEGOTIATE ENERGY EFFICIENCY CON-**  
24 **TRACTS.**

25 (a) **PROGRAM.**—The Secretary of Energy shall create  
26 and administer in the Federal Energy Management Pro-

1 gram a training program to educate Federal contract ne-  
2 gotiation and contract management personnel so that such  
3 contract officers are prepared to—

4 (1) negotiate energy savings performance con-  
5 tracts;

6 (2) conclude effective and timely contracts for  
7 energy efficiency services with all companies offering  
8 energy efficiency services; and

9 (3) review Federal contracts for all products  
10 and services for their potential energy efficiency op-  
11 portunities and implications.

12 (b) SCHEDULE.—The Federal Energy Management  
13 Program shall plan, staff, announce, and begin such train-  
14 ing not later than one year after the date of enactment  
15 of this Act.

16 (c) PERSONNEL TO BE TRAINED.—Personnel appro-  
17 priate to receive such training shall be selected by and sent  
18 for such training from—

19 (1) the Department of Defense;

20 (2) the Department of Veterans Affairs;

21 (3) the Department of Energy;

22 (4) the General Services Administration;

23 (5) the United States Postal Service; and

24 (6) all other Federal agencies and departments  
25 that enter contracts for buildings, building services,

1 electricity and electricity services, natural gas and  
2 natural gas services, heating and air conditioning  
3 services, building fuel purchases, and other types of  
4 procurement or service contracts determined by Fed-  
5 eral Energy Management Program to offer the po-  
6 tential for energy savings and greenhouse gas emis-  
7 sion reductions if negotiated with such goals in  
8 mind.

9 (d) TRAINERS.—Such training may be conducted by  
10 attorneys or contract officers with experience in negoti-  
11 ating and managing such contracts from any agency, and  
12 the Department of Energy shall reimburse their related  
13 salaries and expenses from amounts appropriated for car-  
14 rying out this section to the extent they are not already  
15 employees of the Department of Energy. Such training  
16 may also be provided by private experts hired by the De-  
17 partment of Energy for the purposes of this section, except  
18 that the Department may not hire experts who are simul-  
19 taneously employed by any company under contract to  
20 provide such energy efficiency services to the Federal Gov-  
21 ernment.

22 (e) AUTHORIZATION OF APPROPRIATIONS.—There  
23 are authorized to be appropriated to the Secretary of En-  
24 ergy for carrying out this section \$750,000 for each of  
25 fiscal years 2008 through 2012.

1 **SEC. 186. PROMOTING LONG-TERM ENERGY SAVINGS PER-**  
2 **FORMANCE CONTRACTS AND VERIFYING SAV-**  
3 **INGS.**

4 Section 801(a)(2) of the National Energy Conserva-  
5 tion Policy Act (42 U.S.C. 8287(a)(2)) is amended—

6 (1) in subparagraph (D), by inserting “begin-  
7 ning on the date of the delivery order” after “25  
8 years”; and

9 (2) by adding at the end the following:

10 “(F) PROMOTION OF CONTRACTS.—In car-  
11 rying out this section, a Federal agency shall  
12 not—

13 “(i) establish a Federal agency policy  
14 that limits the maximum contract term  
15 under subparagraph (D) to a period short-  
16 er than 25 years; or

17 “(ii) limit the total amount of obliga-  
18 tions under energy savings performance  
19 contracts or other private financing of en-  
20 ergy savings measures.

21 “(G) MEASUREMENT AND VERIFICATION  
22 REQUIREMENTS FOR PRIVATE FINANCING.—

23 “(i) IN GENERAL.—The evaluations  
24 and savings measurement and verification  
25 required under paragraphs (1) and (3) of

1 section 543(f) shall be used by a Federal  
2 agency to meet the requirements for—

3 “(I) in the case of energy savings  
4 performance contracts, the need for  
5 energy audits, calculation of energy  
6 savings, and any other evaluation of  
7 costs and savings needed to imple-  
8 ment the guarantee of savings under  
9 this section; and

10 “(II) in the case of utility energy  
11 service contracts, needs that are simi-  
12 lar to the purposes described in sub-  
13 clause (I).

14 “(ii) MODIFICATION OF EXISTING  
15 CONTRACTS.—Not later than 180 days  
16 after the date of enactment of this sub-  
17 paragraph, each Federal agency shall, to  
18 the maximum extent practicable, modify  
19 any indefinite delivery and indefinite quan-  
20 tity energy savings performance contracts,  
21 and other indefinite delivery and indefinite  
22 quantity contracts using private financing,  
23 to conform to the amendments made by  
24 subtitle G of title I of the [short title].”.
