

About the Subcommittee

About the Subcommittee

Jurisdiction of the Subcommittee on Environment and Hazardous Materials encompasses issues of environmental protection including solid waste and toxic substances, mining and oil wastes and noise pollution control.

During the 110th Congress, the House of Representatives has passed bills that regulate the flow of international waste into the US and create an export ban on elemental mercury – both of which were reported out of the Subcommittee.

Please go to the jurisdiction tab to learn more about the Subcommittee's jurisdiction.
