

## About the Subcommittee

### About the Subcommittee

Jurisdiction of the Subcommittee on Energy and Air Quality generally includes all national energy policy. This includes legislative issues which include renewable energy resources, energy information, regulation of nuclear facilities, and the Clean Air Act.

During the 110th Congress, the Subcommittee's notable accomplishments include increases in appliance efficiency, lighting efficiency, and green building codes. Legislation which originated in the Subcommittee also increased Corporate Average Fuel Economy (CAFE) standards for the first time in 30 years and provide support for increased usage of biofuels such as cellulosic ethanol.

Please go to the jurisdiction tab to learn more about the Subcommittee's jurisdiction.
