

NASPER - The National All Schedules Prescription Electronic Reporting Act

The NASPER legislation was passed by the 109th Congress and signed into law by the President in 2005. Although the NASPER program was enacted two years ago, this Administration has done virtually nothing to implement it and has failed to include any money for the program in its annual budgets. It is vitally important to our system of government that when Congress establishes national policy by passing laws, those laws are not simply ignored by the Executive Branch. The Committee's investigation seeks to learn more about the benefits of this program as well as the reason for the Administration's failure to seek funding for it.
