

September 14, 2005

Dear Senators,

The undersigned organizations are writing to express our support for the establishment of emergency Medicaid for Katrina survivors. It is critical that survivors have ready access to the full complement of physical, mental health and long term care supports and services they may need over the coming months, and that Medicaid can easily and efficiently provide.

After the events of September 11, 2001 in New York, emergency Medicaid efficiently enrolled individuals without administrative barriers and quickly provided access to needed services. Today, the Medicaid program offers the only viable vehicle to enroll and serve survivors as they enter a state or move from one location to another to pursue family reunification or economic opportunities. Emergency Medicaid eligibility can easily travel with the person, allowing continued access to health care in an otherwise unfamiliar environment.

It is incumbent on the federal government to provide full financial support for emergency Medicaid. Financially strapped states should not be financially penalized for offering their hospitality and compassion to Katrina survivors. Eligibility requirements should be streamlined and documentation requirements eased so that no survivor faces an administrative barrier to getting the health care the survivors may desperately need. We also believe emergency Medicaid should include: coverage for all survivors, not just those categorically eligible; enrollment regardless of assets or income; suspension of scheduled reductions in the FMAP for one year; and postponement the end of Medicaid drug coverage for dual-eligibles in or from the affected states transitioning to the new Medicare drug benefit.

Katrina has demonstrated the ongoing value of and need for a robust Medicaid program, and enacting an emergency relief component at this time is certainly the most efficient means of meeting the substantial needs of Katrina survivors. What is more, cutting Medicaid and other safety net programs at this time may very well leave these individuals without access to needed health and long term care supports and services, as well as other important social services. Therefore, we advocate the indefinite postponement of those elements of the budget reconciliation that pertain to cuts in entitlement programs.

We look forward to working with you over the next weeks to strengthen and improving the Medicaid program in this time of need.

Sincerely,

AFL-CIO
