

**MEMORANDUM**

**February 8, 2019**

**To: Subcommittee on Health Members and Staff**

**Fr: Committee on Energy and Commerce Staff**

**Re: Hearing on “Strengthening Our Health Care System: Legislation to Reverse ACA Sabotage and Ensure Pre-Existing Conditions Protections”**

On Wednesday, February 13<sup>th</sup>, at 10:30 a.m., in Room 2322 of the Rayburn House Office Building, the subcommittee will hold a legislative hearing entitled, “Strengthening Our Health Care System: Legislation to Reverse ACA Sabotage and Ensure Pre-Existing Conditions Protections.”

**I. BACKGROUND**

The Affordable Care Act (ACA) established state and federal insurance marketplaces to increase access to high quality health insurance coverage. The ACA also included comprehensive consumer protection provisions to ensure that all Americans are able to obtain health coverage regardless of health status or a pre-existing condition.

**II. H.R. 1010, RESCINDING THE SHORT-TERM, LIMITED-DURATION INSURANCE REGULATION**

On August 3, 2018, the Department of Health and Human Services (HHS), the Department of Labor (DOL), and the Department of Treasury (Treasury) issued the Short-Term, Limited Duration Insurance (STLDI) final rule to expand the availability of STLDI plans.<sup>1</sup> The final rule extended the maximum duration of STLDI plans from three months to up to 12 months. The final rule allows insurers to renew STLDI plans further for up to 36 months.

STLDI plans are exempt from all of the ACA’s consumer protection provisions and benefit standards. These plans do not provide protections for pre-existing conditions, and are exempt from the ACA’s guaranteed availability requirement, community rating (including gender and age rating protections), and the prohibition on pre-existing conditions exclusions. STLDI plans are also not subject to the prohibition on annual and lifetime coverage limits, and

the annual out-of-pocket limits that protect consumers from large health care costs. Lastly, STLDI plans are not required to cover the ACA's ten categories of essential health benefits, including prescription drugs, hospitalization, maternity coverage, and mental health and substance use disorder.

The August 2018 final rule allows STLDI plans to be sold alongside insurance plans that comply with the ACA's consumer protections, resulting in a parallel market that exposes consumers seeking comprehensive coverage to increased premiums and greater risk. In the final rule, HHS, DOL, and Treasury all conclude that the policy changes "could lead to further worsening of the risk pool by keeping healthy individuals out of the individual market for longer periods of time, increasing premiums for individual market plans and may cause an increase in the number of individuals who are uninsured."<sup>2</sup> The final rule estimated that 200,000 individuals previously enrolled in the ACA marketplace coverage will purchase STLDI instead in 2019, causing average individual market premiums to increase.

However, other nonpartisan estimates projected a more significant impact on the individual market. The Congressional Budget Office (CBO) found that 1.4 million people will enroll in SLTDI plans over a ten-year period (2019-2028).<sup>3</sup> A study by the Urban Institute estimated that 4.3 million individuals will enroll in STLDI in 2019, under the proposed rule.<sup>4</sup> The study concluded that the increase in STLDI enrollment will increase premiums and contribute to an increase in the number of uninsured Americans. The proposed rule did not include the 36-month renewal policy, which will likely exacerbate enrollment declines, premium increases, and the stability of the individual market.

The bill introduced by Rep. Castor (D-FL), Rep. Barragán (D-CA), Rep. Horsford (D-NV), Rep. Moore (D-WI), Rep. Underwood (D-IL), and Rep. DeSaulnier (D-CA) would overturn the STLDI final rule, giving it no force or effect.

### **III. H.R.986, THE PROTECTING AMERICANS WITH PRE-EXISTING CONDITIONS ACT**

On October 22, 2018, the Centers for Medicare & Medicaid Services (CMS), HHS, and Treasury issued a guidance on Section 1332 of the ACA entitled State Relief and Empowerment

Waivers (2018 guidance).<sup>5</sup> Section 1332 (State Innovation Waivers) of the ACA authorizes states to waive certain requirements of the law and experiment with health insurance reforms that could improve the well-being and health of their residents. The law has a clear statutory directive that states must maintain the level of benefits, affordability, and coverage provided to state residents by the ACA.

Section 1332 requires states to meet four statutory “guardrails” simultaneously and demonstrate that the proposed waiver will provide comprehensive, affordable coverage to a comparable number of residents as under the ACA, without increasing the federal deficit. In the 2018 guidance, HHS and Treasury revised the agencies’ interpretation of the statutory requirements, and significantly loosened the standards that states must meet in order to receive waiver approval.

The 2018 guidance set forth weaker requirements that must be met for the affordability and comprehensiveness guardrails, and adopted a new definition of what classifies as coverage. The 2018 guidance allows states to simply demonstrate that a comparable number of residents will have *access* to comprehensive and affordable coverage, regardless of whether they actually enroll in that coverage, thereby allowing the Secretaries of HHS and Treasury to approve waivers that do not provide coverage that is as affordable or as comprehensive as under the ACA. The 2018 guidance also allows states to receive waiver approval for proposals that direct the ACA’s tax credit subsidies towards STLDI plans and other types of health insurance plans that do not provide protections for pre-existing conditions.

The legislation introduced by Rep. Kuster (D-NH), Rep. Beyer (D-VA), and Rep. Courtney (D-CT) would revoke the Section 1332 guidance issued on October 2018. The bill would also prevent the Secretaries of HHS and Treasury from promulgating any substantially similar guidance or rule.

#### **IV. H.R.987, MARKETING AND OUTREACH RESTORATION TO EMPOWER (MORE) HEALTH EDUCATION ACT OF 2019**

On August 31, 2017, the Trump Administration reduced funding for the ACA’s 2018 Open Enrollment consumer outreach and enrollment educational activities from \$100 million to \$10 million, a 90 percent cut from the previous year.<sup>6</sup> The Trump Administration continued to fund outreach and enrollment education activities at \$10 million during the 2019 Open

Enrollment period.<sup>7</sup> Studies have shown that outreach efforts expand the number of Americans with comprehensive health insurance, improving the makeup of the insurance risk pool and reducing premiums for all enrollees.<sup>8</sup> About 8.4 million people enrolled in the ACA Federal marketplaces during the 2019 Open Enrollment period, compared to 9.2 million during the 2017 Open Enrollment period.<sup>9</sup>

There was an even more significant decline in new enrollment under the Trump Administration. Approximately one million fewer new consumers enrolled in marketplace plans during the 2019 Open Enrollment period than the final year of Open Enrollment of the Obama Administration.<sup>10</sup> Studies have shown that reductions in funding for outreach and enrollment depresses new consumer enrollments.<sup>11</sup> A study conducted by the Commonwealth Fund found that 40 percent of uninsured adults are still unaware of the ACA marketplaces and the law's tax credits that help make coverage affordable.<sup>12</sup>

The legislation, introduced by Rep. Blunt Rochester (D-DE), would require HHS to conduct consumer outreach and enrollment educational activities for the ACA marketplaces, and it funds these activities at \$100 million per year. The bill further prohibits HHS from expending the funds on promoting plans that do not provide comprehensive consumer protections, including STLDI plans and association health plans.
