RE: Support for S.1, “Keystone XL Pipeline Approval Act”

Dear Speaker Boehner and Leader Pelosi:

On behalf of Consumer Energy Alliance (CEA) and our more than 250 member companies and organizations, we would like to convey our strong support for S. 1, legislation to approve the Keystone XL Pipeline. CEA encourages the U.S. House of Representatives to swiftly pass this bill and allow this project to move forward now.

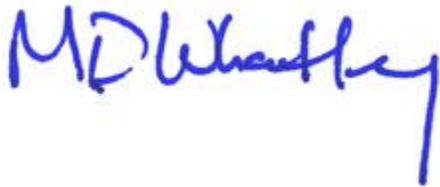

CEA has long supported the Keystone XL project as a safe and environmentally responsible means to significantly increase the stability and security of America’s energy supply and to grow the economy. Since 2010, CEA consumer-advocates have written more than 1.5 million letters to the U.S. State Department, Congress and the White House to encourage approval of the pipeline. Polling sponsored by CEA last year found that at least 60 percent of citizens in several states strongly support Keystone XL.

By reducing overseas oil imports, the United States can mitigate the impacts that instability abroad can have for oil prices and, by effect, benefit millions of American energy consumers. Recent increases in U.S. and Canadian oil production have depressed global oil prices, and consumers and the U.S. economy now benefit from significantly lower gasoline prices. Keystone XL will play a vital role in maintaining these current gains in North American energy self-sufficiency and fuel affordability for the long term.

Further, since the Canadian oil sands will be produced regardless of their destination, it makes far more sense for the United States to refine and consume the oil here, under some of the strictest environmental standards, than for Canada to ship it abroad to countries with laxer regulations.

We strongly believe this project is in the national and the consumers' best interest, and it is well past time to approve Keystone XL. We look forward to the House's expeditious action to move Keystone XL forward.

Sincerely,

Michael Whatley
Executive Vice President
