Re: Letter of Support for HR6

To our Honorable Congressmen and Congresswomen,

As a physician-owned, multi-specialty medical group in Iowa, we would like to urge the passing of HR6, the 21st Century Cures Bill. Specifically, Section 3041, which addresses a clarification of the Sunshine Act. This clarification allows medical journals to be reprinted and distributed for educational purposes and therefore exempt from reporting.

As a private practice organization, treating patients is our highest priority. Having up to date medical knowledge is vital to taking proper care of our patients. We must do everything we can to encourage dissemination of new research and evidence-based-medicine, as the average practicing doctor's medical knowledge is often years behind that of what is most recently published.

We therefore lend our support to HR6 & Section 3041 and strongly urge its passing.

Thank you for your time and service,

C. Edward Brown, CEO
The Iowa Clinic, P.C.
