Not all the sequence id reported in 2009Q2 just the one involving the vehicles listed in the spreadsheet. There were eight 2007 cobalt airbag injury incident reported in 2009Q2 so we will get all 8 incidents.

They want all the sequence ID reported in 2009Q2

???!!!!!!!????!!!!!!

Good for them as long as they follow the ground rules (annotating them per the DI SOP) and don't use this against us when they alot their time to either open one of our referrals or review DIs.

There are more than 22. They want all the sequence ID reported in 2009Q2. And yes, they will be reviewing these sequence ids.

Shirong make a table showing all the sequence id DAD requested along with the full DI records. I let them review this before we get all these sequence ids.
