Frontiers of Freedom Statement of Support of H.R. 4795:
'The Promoting New Manufacturing Act'

"Frontiers of Freedom strongly supports H.R. 4795, 'The Promoting New Manufacturing Act.' At a time when jobs are scarce and American companies are under increasing pressure from competition overseas, we should do all we can to remove barriers to job creation and expand the economy. H.R. 4795 does just this by promoting transparency and reducing delays in the Clean Air Act permitting process, making it easier to construct new factories and create new jobs. We urge Congress to pass this pro-growth legislation and get Americans back to work."

-George Landrith, President Frontiers of Freedom
