

U.S. Senator Malcolm Wallop  
(1933-2011) • *Founder*

George C. Landrith  
*President & CEO*

January 6, 2015

Frontiers of Freedom released the following statement by its president, George Landrith, in support of legislation authorizing the Keystone XL Pipeline:

"Frontiers of Freedom fully supports Representative Cramer's legislation to authorize the Keystone XL pipeline. The matter has been studied intensely for years. Obama's own State Department has certified the benefits and safety of the pipeline.

"The American public overwhelmingly supports construction of the pipeline. The pipeline's completion will improve environmental safety. In the long run, it will reduce our and the world's dependence on energy from despotic regimes that use their oil profits to fund terror and instability around the globe.

"Yet despite all of this, after nine votes approving of the pipeline, Harry Reid has for years blocked legislation approving of the pipeline. It is time to move past Reid's obstructionism and advance this job creating measure that will further our goal of energy independence.

"The time for further study, and more delay ended years ago. We encourage the House and the Senate to pass, and the President to sign, this important legislation that will improve the economy, create jobs, benefit the environment, increase our North American energy independence, and reduce the perverse influence of despotic oil producing regimes around the globe.

"It is not often that so many good outcomes can be obtained by the passage of a single measure. But this only points to the importance of passing this bill."
