

**The below statement regarding the bipartisan, bicameral STELAR Act is attributable to Sena Fitzmaurice, VP Government Communications, Comcast Corporation:**

"Comcast commends the leaders of both the House and Senate Committees for acting in a timely fashion to shape the bipartisan Satellite Television Extension and Localism Act Reauthorization (STELAR) Act of 2014, which has real benefits for consumers and competition, including phasing out the integration ban. We support its passage. Consumers today enjoy access to an unprecedented number of video programming offerings, and this legislation will help ensure that this marketplace continues to thrive and grow."
